Section 10: Academic advice, programme-specific advice and examination advice

Section 11: Credit transfers

Section 12: Types of examination

Section 13: Multiple-choice examinations

Section 14: Language of examination

Section 15: Examination registration and admission

Section 16: De-registration, failure to attend and withdrawal from examinations

Section 17: Special examination arrangements and protective provisions

Section 18: Assessment of examinations

Section 19: Notification of examination results

Section 20: Results of module examinations

Section 21: Bachelor thesis module

Section 22: Examination Board

Section 23: Examiners, observers and electronic plagiarism checks

Section 24: Cheating and offences

Section 25: Invalid examinations and revocation of bachelor degrees

Section 26: Examination file and access to files

Section 27: Completion of the programme and documents issued upon completion

Section 28: Transitional provisions

Section 29: Credit points for and scope of the bachelor degree in business administration

Section 30: Credit points for and scope of the bachelor degree in social sciences

Section 31: Credit points for and scope of the bachelor degree in economics

Section 32: Credit points for and scope of the bachelor degree in business informatics

Section 33: Credit points for and scope of the bachelor degree in management, economics and social sciences

Section 34: Publication and entry into effect

Overview of the annexes

On the basis of Section 2 (4) and Section 64 of the Act on the Universities of the State of North Rhine-Westphalia (Hochschulgesetz, HG) in the version of the Future of Higher Education Act (Hochschulzukunftsgesetz, HZG NRW) of 16 September 2014 (Law and Official Gazette of North Rhine-Westphalia (Gesetz- und Verordnungsblatt des Landes Nordrhein-Westfalen, GV NRW) p. 547), last amended by Article 10 of the Act on the Consistent and Solidary Management of the COVID-19 Pandemic in North Rhine-Westphalia and on the Amendment of State Law in Relation to the Effects of a Pandemic of 14 April 2020 (GV. NRW p. 217b), the Faculty of Management, Economics and Social Sciences has issued the following regulations:

Section 1: Scope of Application

¹These Examination Regulations cover programme details, the examination procedure and the degree awarded for the programmes in business administration, social sciences, economics, business informatics and management, economics and social sciences at the University of Cologne. ²The module contents and requirements and the fields of study are set out in the annexes. ³The annexes form part of these Examination Regulations.

Section 2: Objective of the programme

¹The bachelor programme prepares students for jobs that require them to apply academic knowledge and methods. ²Academic in nature, the programme imparts subject-related, methodical and communicative skills, enabling students to find solutions to theoretical and practical problems; by promoting a critical and constructive approach, it also helps shape trends and changes in society and the world of work.¹ ³Before commencing their studies or during semester breaks, students are recommended to undertake internships independently of their courses to supplement the content of the programme and gain first-hand experience of practice significant to their chosen programme; when planning internships, examination candidates must bear in mind the scheduling of any relevant examinations. ⁴The bachelor degree is a first-level degree awarded by the Faculty of Management, Economics and Social Sciences of the University of Cologne (hereinafter referred to as the "Faculty") and forms the basis for master programmes in a related subject area.

¹ Students acquire the necessary knowledge and competences that enable them to exercise good scientific practice and to act responsibly in science in accordance with the University of Cologne's "Guidelines for Good Scientific Practice" (Official Notices of the University of Cologne 8/2022), as amended.

Section 3: Degree awarded

¹Students who successfully complete the programmes in business administration, social sciences, economics, business informatics and management, economics and social sciences are awarded the academic title of “Bachelor of Science, B. Sc”.

Section 4: Start of the programme, standard period of study, organisation of the programme and language skills

(1) ¹The programme in business administration and economics can be started in the winter semester and in the summer semester, the programme in social sciences, business informatics and management, economics and social sciences can only be started in the winter semester. ²The standard period of study is six semesters.

(2) ¹The Faculty of Management, Economics and Social Sciences shall organise the programme in such a way that it can be completed within the standard period of study. ²The Faculty shall provide appropriate assistance to students to help them organise their studies; this shall include providing programme-specific advisory services and evaluating and assuring teaching quality.

(3) ¹A curriculum overview shall be drawn up and made accessible in an appropriate form. ²This curriculum overview does not form part of the Examination Regulations.

(4) ¹Applicants for the programme in economics or the programme in management, economics and social sciences must provide evidence of knowledge of the English language at level B2 of the Common European Framework of Reference for Languages as an admission requirement according to Section 49 (8) HG. ²For applicants who have a university entrance qualification (“Hochschulzugangsberechtigung”) within the meaning of Section 2 of the Equivalence Regulation (Gleichwertigkeitsverordnung, GIVO), evidence shall be provided by way of the continued participation in English classes through to the end of Qualification Phase II in the general university entrance qualification or respectively through to the end of Qualification Phase I in upper secondary education; the marks obtained in the university entrance qualification must correspond to at least “sufficient” or five points. ³Moreover, the evidence may be provided by way of the following certificates: a) TOEFL, Internet-based Test (iBT) with at least 72 points; b) IELTS Test 5.5; c) Cambridge English Qualifications: B2 First (formerly Cambridge English: First, FCE); d) TELC Certificate: B2; e) TOEIC with at least the following scores: 400 (listening), 385 (reading), 150 (writing) and 160 (speaking). ⁴Applicants in the programme in management, economics and social sciences are not required to have knowledge of the German language.

Section 5: Total credit points and programme structure

(1) Students must earn 180 credit points, as described in Section 7, during the programme.

(2) ¹The programme in business administration comprises at least 26 modules, the programme in social sciences at least 24 modules, the programme in economics at least 25 modules, the programme in business informatics at least 22 modules and the programme in management, economics and social sciences at least 25 modules as defined in Section 6. ²The programmes are each divided into core, advanced, supplementary (excluding the programme in economics) and specialisation modules. ³The provisions concerning the total credit points for and scope of the programme are set out in the Sections 29 to 32.

(3) The programmes shall be conducted in accordance with the respective provisions set out in the annexes to these Examination Regulations.

(4) ¹ If one or more modules from another faculty are offered in the programme, the regulations of the faculty offering the module shall apply thereto. ²The modules concerned are shown in the module descriptions.

Section 6: Modules

(1) The programmes are modular in structure.

(2) ¹Modularisation is a process whereby subject matter is grouped into discrete, consecutive units of related topics that carry credit points (CPs). ²The module content is designed to be able to be delivered within one semester or two semesters as a rule. ³Where there are special grounds to do so, a module can also be designed to run for more than two semesters.

(3) ¹Modules usually carry 6, 9, 12, 15 or 18 credit points. ²Modules worth six credit points can usually be completed within one semester; the other modules usually take a maximum of two semesters to complete.

(4) The following types of module exist:

- a) Core modules, which are designed to deliver basic knowledge;
- b) Advanced modules, which build on the modules specified in a) and are designed to enable the student to develop more advanced knowledge and skills;
- c) Specialisation modules, designed to enable the student to specialise in a certain area;
- d) Supplementary modules, which can be taken at any time during the programme.

(5) Modules can be offered as compulsory or elective modules:

- a) Students must take the compulsory modules; these modules are marked as such (or as "Pflichtmodul") in the annexes;

b) Students must choose elective modules from a list of options and are required to study them as per the provisions set out in the annexes; these modules are marked as such (or as “Wahlpflichtmodul”) in the annexes.

(6) ¹Provisions concerning the individual modules and the module examinations are set out in the annexes. ²In particular, these cover the following aspects:

- a) Module code;
- b) Module title;
- c) Conditions of participation in the module;
- d) Module start date;
- e) Module availability (which semester);
- f) Module duration in semesters;
- g) Teaching formats for the module and compulsory participation;
- h) Examination requirements;
- i) Type and duration of the module examination, any examination components and the rules concerning the pass mark and resits;
- j) Language of examination;
- k) Limits on attempts;
- l) Indication of whether the module is compulsory or elective;
- m) Credit points attainable for the module;
- n) Prerequisites for the awarding of credit points;
- o) In the case of elective modules: the share of credit points of the module in the overall credit points available for the elective in question;
- p) Weighting of the module mark in relation to the overall mark.

³If a module and its examinations are not offered during the next semester, another examination date must be offered during the current or next semester. ⁴The registration deadlines of this date must allow students who did not pass the examination on the first date to register for the second date. ⁵The second date must be chosen promptly in accordance with Clause 4, at the latest during the next semester. ⁶The provisions of Clauses 3 to 5 shall apply only to modules which are concluded with an examination in accordance with Section 12 (3) a) to c).

(7) ¹Modules usually finish with one examination. ²In the case of modules carrying six credit points, the module examination consists of one component. ³The module examination for modules

carrying nine credit points can consist of two components. ⁴In the case of modules carrying 12, 15 or 18 credit points, the module examination can consist of a maximum of three examination components. ⁵Individual modules can also be completed without an examination. ⁶The rules concerning this shall be set out in the annexes.

(8) If a module examination consists of several examination components, these are usually different types or forms of examination as described in Section 12 (2) to (6).

(9) ¹Prerequisites may be defined for participation in a module or module element. ²The prerequisites are specified in the annex.

Section 7: Credit point system and general criteria for the awarding of credit points

(1) ¹Students receive credit points ("CPs", or "Leistungspunkte (LP)" in German) as evidence of successful participation in modules. ²Credit points are calculated based on the anticipated student workload for the module and are a quantitative indicator of the total workload for the programme. ³They include both the time spent in class and on preparing for and following up classes (i.e. for hours of attendance and self-study), revision for examinations, examinations themselves, including the thesis and final examination (of the course) as well as study time and, where appropriate, practical components. ⁴Credit points are equivalent to the credits awarded in the European Credit Transfer and Accumulation System. ⁵One credit point corresponds to an average workload of around 30 hours. ⁶As a rule, students are required to attain 60 credit points per year of study.

(2) ¹Credit points are awarded when the students can show that they have completed all of the coursework and passed all of the examinations required for the module in question. ²Section 48 (5) HG shall apply in relation to the accumulation of credit points during academic leave. ³Notwithstanding Section 48 (5) HG, coursework conducted and examinations taken on non-completed modules may be shown on the transcript of records.

(3) The same course may not award credit points multiple times for different modules in a programme or different areas of study.

Section 8: Studium Integrale

(1) ¹The "Studium Integrale" (SI) is an interdisciplinary component of the programme. ²Designed to enhance employability, it can be academic and scientific in content and/or cover professional subject matter.

(2) The Studium Integrale is intended to foster and impart skills that go beyond specific subject-based knowledge or that concern basic academic and personal traits, i.e. scientific inquisitiveness, systematic and analytical thinking, ability to deal with complexity, a solution-oriented approach and other skills, such as team skills and foreign languages.

(3) ¹The Studium Integrale courses are run by the faculties, the Professional Center as well as by the International Office of the University of Cologne. ²Students are not permitted to attend Studium Integrale courses offered on their programme or in their subject that are designed only for students in other programmes.

(4) ¹The Studium Integrale carries 12 credit points and formally counts as a module. ²Notwithstanding section 6 (2), the courses can be delivered and studied at any time during the programme. ³Further provisions shall be specified by the Examination Board. ⁴There is no restriction on the number of attempts possible for Studium Integrale examinations. ⁵No mark is awarded for the module. ⁶If the assessment of an examination or the registration of participation in a course is not yet entered in the campus management system at the time when the successful completion of the course is determined according to Section 27 (1) Clause 1, the registration of the examination or participation in a course shall be cancelled ex officio, unless the student objects within a period of two weeks after receipt of the notification of the successful completion of the examination procedure.

(5) ¹Periods of training abroad and work experience can be credited in the Studium Integrale. ²The credit transfer criteria are specified by the Examination Board, taking into account the minimum requirements and rules concerning credit transfers, which are set out in the annexes.

(6) ¹The students themselves are responsible for planning and completing their Studium Integrale. ²The faculties and the Professional Center as well as the International Office of the University of Cologne offer an advisory service to assist students in their choices.

(7) In the event of a student moving to a different programme, any credit gained in the Studium Integrale is transferred to the Studium Integrale in the new programme, subject to the provisions of (3) above.

Section 9: Courses

(1) The courses are usually delivered in one of the following formats:

a) Lecture: A coherent session in which basic and specialist knowledge and methods are presented and taught to students, usually in classes that take place at regular intervals throughout the semester.

b) Seminar: Discourse on fundamental or more advanced issues.

c) Exercise: A course that accompanies lectures or seminars. It involves discussion of tasks and independent work to gain a more advanced understanding of course content or work on exercises/experiments with the aim of acquiring and consolidating knowledge.

d) Practical component: Students acquire and consolidate knowledge by performing practical tasks or experiments. Practical components can be conducted within the University (e.g. lab practicals) or outside (e.g. field practicals, internships or teaching placements).

e) Field trip: A class conducted outside the University to enable students to see how aspects of the subject matter they have covered work in real life, to grasp relevant factors/structures based on observation and to practise applying the knowledge they have acquired and/or draw conclusions.

f) Language course: A course in which students acquire and/or deepen knowledge of a foreign language.

g) Project: Action-based, independent work on a complex task or problem in consecutive phases (planning, execution and presentation of results), usually within a previously specified period.

h) Tutorial: This usually accompanies basic courses. Students practise techniques and develop a more advanced understanding of basic knowledge in small groups; the complex content of the main course is explained to them or practical examples are used to illustrate theoretical aspects.

(2) The course formats described in (1) above can be offered in combined form.

(3) ¹If the number of participants on a course has to be limited due to the nature or purpose of the course or for other reasons related to research, artistic development projects, teaching, artistry or patient care, and if the number of applicants exceeds the capacity, the number of participants can be limited in accordance with Section 59 (2) HG. ²Students who need to attend the course in question at that particular time in order to progress with their studies must be given priority. ³All other details shall be specified by the Faculty in separate regulations for each course concerned. ⁴As far as resources allow, it shall be ensured that students do not lose any time due to limits on participant numbers. ⁵In order to be admitted to examinations related to limited-participation courses, students must have attended the courses upon which the examinations are based.

(4) ¹Admission to an examination or the awarding of credit points may require regular participation in courses as part of modules and their examination. ²The relevant provisions are set out in the annex. ³The requirement of regular attendance is only permissible if it is proportionate and the learning objective can only be achieved through regular attendance. ⁴As a rule, this is the case if at least one of the following reasons applies:

a) The obligation to demonstrably participate regularly in modules or courses results from the introduction to and practice of academic discourse, which is the primary and formative element and essential learning objective of the module or course. Scientific discourse is characterised by the presentation of scientific questions and argumentation and one's own positioning as well as critical reflection and mutual exchange about what has been presented.

b) The obligation to demonstrably participate regularly in modules or courses results from the didactic design of the course, which, in order to achieve the learning objective, provides for continuously participative, interactive and cooperative teaching and learning formats as well as reflection on the contents and results under guidance.

c) The obligation to provide evidence of regular participation in modules or courses is prescribed by legal provisions.

d) The obligation to provide evidence of regular participation in modules or courses is mandatory for reasons of occupational health and safety and laboratory safety.

e) The obligation to provide evidence of regular participation in modules or courses results from the need to acquire practical skills and abilities that cannot be acquired in any other way, and to test, practise and reflect on them under supervision.

f) The obligation to demonstrably participate regularly in modules or courses arises from the need to practise sign language or oral or written language skills and abilities as well as their practical linguistic performance and reflection within the framework of communicative and personal interaction under guidance.

g) The obligation to demonstrably participate regularly in modules or courses results from the necessity of examining content-relevant objects and contexts in situations and the location- and situation-dependent acquisition of practical or occupationally relevant skills and abilities with the inclusion of non-university learning elements.

⁵As a rule, regular attendance is demonstrable if the number of absences does not exceed 20%.

⁶In particular in the case of practical components and field trips, deviations from this provision may be permitted. ⁷Corresponding regulations are stated in the annexes. ⁸If attendance is compulsory, absences cannot be compensated by other work. ⁹Section 17 (2) to (4) shall remain unaffected. ¹⁰Regular participation in the courses and their preparation and follow-up is recommended.

Section 10: Academic advice, programme-specific advice and examination advice

(1) Legally binding information concerning examinations is supplied by the Chair of the Examination Board, their deputy, the manager of the relevant examination office or their deputy.

(2) ¹The University of Cologne has a Student Advisory and Counselling Centre (Zentrale Studienberatung), which provides general advice for students, particularly with regard to study options and programme requirements. ²There are also Faculty-wide advisory services for general academic advice. ³The Teacher Education Advisory Centre (Beratungszentrum des Zentrums für LehrerInnenbildung) is also available to provide general academic advice on the teacher education programmes.

(3) ¹Programme-specific advice is provided during the designated times by the University's associated teaching staff involved in the teaching in the programme. ²The designated times shall be announced by means of notices in the institutes and on the Internet. ³Students are recommended to take advantage of the one-to-one advice sessions.

(4) The students' union executive committee (Allgemeine Studierendenausschuss, AStA) and the Faculty's student council (Fachschaft) offer advice on general questions concerning students' organisation of their studies.

(5) ¹For the special questions that international students have and for students preparing to study abroad, there are Faculty-wide advisory services in addition to the International Office (Akademisches Auslandsamt) of the University of Cologne. ²There is also a Faculty-wide advisory service for questions concerning credit transfers for examinations taken abroad.

(6) For students suffering personal difficulties due to their studies, the psychosocial counselling service provided by Kölner Studentenwerk can be particularly helpful.

(7) Students with disability or chronic or mental illness can seek advice from the advisory service provided by the University's administration (Inclusion Service Centre) or the representative of students with disabilities or chronic illnesses.

Section 11: Credit transfers

(1) ¹Examinations taken in courses of study at other state or state-recognised institutions of higher education, at state or state-recognised universities of vocational education or in courses of study at foreign state or state-recognised institutions of higher education shall be recognised on application, provided that there is no substantial difference between the competences attained and the competences to be replaced; an examination of equivalence shall not take place. ²The same shall apply to degrees awarded on completion of courses of study within the meaning of Clause 1. ³Recognition within the meaning of Clauses 1 and 2 shall serve the purpose of continuing studies, taking examinations or taking up further studies or admission to doctoral studies.

2) ¹Upon application, knowledge and qualifications attained by means other than study may be recognised on the basis of documents submitted if such knowledge and qualifications are equivalent in content and level to the examination achievements which they are to replace. ²Recognition of such non-university achievements beyond half of the examination achievements to be taken shall not be permissible. ³Pupils who, in the consensual judgement of the school and the University, display special talents may, in individual cases, be admitted to courses and examinations as young students outside the enrolment regulations. ⁴Their study and examination achievements shall, on application, be taken into account in a later degree programme. ⁵In the context of the Studium Integrale, examination achievements from other institutions may be credited if the Examination Board has reached an agreement with the respective institution. ⁶The Examination Board shall regulate the details.

(3) Where credits are to be transferred, the marks shall be transferred and included in the overall mark, provided the marking systems are similar. Where they are not similar, the word "bestanden" (passed) will be shown on the transcript. Transferred credits may be marked as such on the transcript of records.

(4) ¹Any requirements completed elsewhere cannot be recognised again if they have already been performed at the University of Cologne. ² This also applies if this performance has not yet been assessed.

(5) ¹Students are responsible for presenting the documents required for the credit transfer process. ²Any applications for the recognition of a document must be made in writing. ³The Chair of the Examination Board decides whether credit will be transferred. ⁴As a general rule, representatives of the subject area in question should be consulted prior to the decision as to whether equivalence is proven. ⁵In general, a decision must be issued within three months, and the student must be immediately informed by updating the recognition status within the campus management system; any rejection of the recognition of a document must be justified in writing. ⁶If a credit transfer application as per (1) above is turned down, the applicant may submit an appeal for the decision to be reviewed by the Rectorate. ⁷The Rectorate shall then issue to the Chair of the Examination Board a recommendation regarding how to proceed with the application.

(6) ¹Applications for credit transfers for examinations taken at a higher education institution outside the area to which the Basic Law of Germany (Grundgesetz) applies during the student's studies at the Faculty of Management, Economics and Social Sciences of the University of Cologne must be submitted no later than three months after resuming studies at the Faculty. ²If the other higher education institution has not issued a transcript of records by this time, the deadline shall be extended to three months after the transcript of records is issued. ³Applications received after the deadline cannot be considered. ⁴The deadlines according to Clauses 1 to 3 do not apply to applications for recognition of achievements within the framework of the Studium Integrale.

Section 12: Types of examination

(1) Modules usually finish with one examination, which is oriented towards the learning objectives and learning outcomes defined for the module.

(2) ¹Module examinations can be taken in written, oral, practical or combined form. ²The form of examination must be suitable to test the learning objectives and learning outcomes imparted in the module and to prove that the examination candidate has mastered the contents and methods of the module in the essential contexts and can apply the acquired knowledge and skills. ³The form and duration as well as the workload of the respective examination are listed in detail in the annex. ⁴Where there are significant reasons to do so, the Chair of the Examination Board may determine a different type of examination upon written application.

(3) As a rule, the written examination takes place in the following forms:

a) Written examination: A written examination is a piece of work to be completed under personal supervision or electronic supervision (video supervision), in which assigned tasks are to be completed alone and independently using only the approved aids. The duration of an examination is usually at least 45 and at most 180 minutes and is specified for the

respective examination in the annex. Examinations may be conducted in written or electronic form. Examinations may also be conducted in whole or in part in the form of a multiple-choice procedure in accordance with Section 13.

b) Semester paper: A semester paper is an independent written piece elaborating a given topic. The duration and scope of the semester paper result from the workload of the module, which is shown in the annex. A semester paper in a module with 6 credit points has a scope of 2 credit points, in a module with 9 credit points of 3 credit points, in a module with 12 credit points of 4 credit points and in a module with 15 credit points of 5 credit points; one credit point corresponds to an average workload of approximately 30 hours. It must be submitted in written form or in an electronic format specified by the examiner. A declaration with the following wording must be attached to the semester paper: "I hereby affirm that I have written this paper independently and without the use of other aids than those stated. All passages taken verbatim or in spirit from published and unpublished external writings are marked as such."

c) A take-home examination is the independent written processing of one or more examination tasks within a specified examination time. A take-home examination can be conducted in written or electronic form. The duration and scope of the take-home examination result from the workload of the module, which is shown in the annex. A take-home examination in a module with 6 credit points has a scope of 2 credit points, in a module with 9 credit points of 3 credit points, in a module with 12 credit points of 4 credit points and in a module with 15 credit points of 5 credit points; one credit point corresponds to an average workload of approximately 30 hours.

d) An internship report is a written presentation and analysis of the tasks completed in an intra- or extra-university internship. An internship report can be carried out in written or electronic form. The duration and scope of the internship report result from the workload of the module, which is shown in the annex. An internship report in a module with 6 credit points has a scope of 3 credit points, in a module with 9 credit points of 4.5 credit points, in a module with 12 credit points of 6 credit points and in a module with 15 credit points of 7.5 credit points; one credit point corresponds to an average workload of approximately 30 hours.

e) A portfolio is a collection of several completed tasks in the broadest sense, which serves to document and reflect on the learning process and which is assessed in summary. A portfolio can be carried out in written or electronic form. The duration and scope of the portfolio result from the workload of the module, which is shown in the annex. A portfolio in a module with 6 credit points has a scope of 3 credit points, in a module with 9 credit points of 4.5 credit points, in a module with 12 credit points of 6 credit points and in a module with 15 credit points of 7.5 credit points; one credit point corresponds to an average workload of approximately 30 hours.

(4) As a rule, the oral examination takes place in the following forms:

a) Oral examinations (“Mündliche Prüfung”): In oral examinations, an examination candidate attempts to demonstrate that they understand the context of the examination area and are able to place specific questions in this context. Oral examinations are held by at least two examiners or by one examiner in the presence of an expert assessor. As a rule, an oral examination lasts at least 20 and at most 45 minutes per examination candidate and may also be conducted with the aid of electronic communication, if necessary. The duration, essential procedure as well as the subjects and results are to be recorded in a protocol. Examination candidates of the same degree programme shall be allowed to participate in oral examinations as listeners upon request, unless an examination candidate objects. The examiner shall decide on the application in accordance with the number of places available. Participation does not extend to discussion and announcement of the examination result.

b) Presentation (“Referat”): A presentation serves to present a given topic or subject matter in a limited amount of time. The examination takes place within the framework of a course in the form of a lecture with the aid of suitable presentation techniques. If necessary, a presentation can also be carried out with the aid of electronic communication. The duration and scope of a presentation result from the workload of the module, which is shown in the annex. A presentation in a module with 6 credit points has a scope of 1 credit point, in a module with 9 credit points of 1.5 credit points, in a module with 12 credit points of 2 credit points and in a module with 15 credit points of 2.5 credit points; one credit point corresponds to an average workload of approximately 30 hours.

c) Talk (“Vortrag”): In the context of a talk, independently developed aspects or perspectives of a subject area are presented in a limited amount of time with the help of suitable presentation techniques. If necessary, a talk can also be carried out with the help of electronic communication. The duration and scope of a talk result from the workload of the module, which is shown in the annex. A talk in a module with 6 credit points has a scope of 1 credit point, in a module with 9 credit points of 1.5 credit points, in a module with 12 credit points of 2 credit points and in a module with 15 credit points of 2.5 credit points; one credit point corresponds to an average workload of approximately 30 hours.

(5) The main practical forms of examination include setting up and conducting experiments plus examinations that result in a non-text deliverable.

(6) ¹Combined examinations generally comprise different forms of examination which are suitable for assessing the acquisition of different types of competences. ²As a rule, combined examinations include: workplace-based assessments, simulations, presentations with a written paper, papers with a talk, project work and poster presentations, whereby the following applies:

a) A project work is the independent processing of a task or a problem in a group or by an individual, from the planning and implementation to the documentation of the result in written, oral, electronic or other form. The processing time and scope of a project work result from the workload of the module, which is shown in the annex. A project work in a module with 6 credit points has a scope of 3 credit points, in a module with 9 credit points of 4.5 credit points, in a module with 12 credit points of 6 credit points and in a module with 15

credit points of 7.5 credit points; one credit point corresponds to an average workload of approximately 30 hours.

b) A poster presentation is a condensed large-format textual and/or pictorial presentation of scientific research results, methods and findings on a scientific question and can be carried out in written or electronic form. It serves to document and reflect on the learning process and is accompanied by an oral presentation of results and findings. The duration and scope of a poster presentation result from the workload of the module, which is shown in the annex. A poster presentation in a module with 6 credit points has a scope of 1 credit point, in a module with 9 credit points of 1.5 credit points, in a module with 12 credit points of 2 credit points and in a module with 15 credit points of 2.5 credit points; one credit point corresponds to an average workload of approximately 30 hours.

(7) Where appropriate and as decided by the examiner, examinations can be conducted as group oral examinations if a clear distinction between, and assessment of, each group member's contribution is possible.

(8) ¹The examiners shall determine whether the specific examination is to be conducted in attendance or in electronic form. ²The examination candidates are generally informed at the start of the course, but at the latest at the start of the examination registration phase, that an examination will be conducted in electronic form and whether it will be accompanied by video supervision. ³In the case of an examination conducted in electronic form, examination candidates shall be given sufficient opportunity before the examination to familiarise themselves with the electronic information and communication systems used in the respective examination. ⁴With regard to the provisions of data protection law and the implementation of video proctoring, the provisions of the Regulations Governing Online Examinations and Video Proctoring of the University of Cologne, as amended, shall apply, with the exception of Section 5 (4) Clauses 1 and 2.

(9) ¹Disruptions in the examination process must be reported immediately to the Chair of the Examination Board or the examiner in writing or by means of an electronic transmission channel provided and announced by the Examination Board on the website of the examination office. ²The assertion of a claim is excluded at the latest if more than three working days have elapsed since the examination was taken.

Section 13: Multiple-choice examinations

(1) ¹A multiple-choice examination is an examination in which the minimum standard required of the candidate in the examination can only be achieved by marking or indicating the correct or incorrect answers. ²Multiple-choice examinations or multiple-choice examination questions are only permitted if they are able to prove whether the candidate is proficient in the main content and methods covered in the module and is able to apply the knowledge and skills acquired.

(2) ¹The examination questions must be worded in such a way as to be clear, unambiguous and non-contradictory, and such that they are able to determine whether the candidate possesses the

examinable knowledge as per Clause 2 of (1) above. ²Variations of the same examination questions (and possible answers) are permitted. ³Points may not be deducted during the completion of an examination task.

(3) If the roles of examiner and exam setter are performed by different individuals – due to how the exam-setting process of the relevant faculty or programme is specifically organised, i.e. the role of examiner is performed by some other party appointed by the Examination Regulations – then the following (4) to (9) also apply.

(4) ¹The examiner chooses the subject matter to be covered in the examination, formulates the questions, specifies the possible answers and draws up the marking rules and criteria in accordance with (6) below. ²The pass criteria for the examination must be defined in advance. ³The examiner shall have the content and form of the questions reviewed by a second examiner prior to the examination.

(5) ¹The examiner can also create a pool of equivalent questions, from which different questions are given to each candidate. ²In this case, the questions are assigned on a random basis. ³It must be ensured that the examination questions are equivalent.

(6) ¹Candidates who attain at least 60% of the overall points attainable are deemed to have passed the examination. ²If the overall average of the points attained in an examination minus 12% of the overall mean is below 60% but higher than 50% of the total number of points possible, the pass threshold shall be calculated in accordance with this flexibility clause. ³Marking systems that merely define an absolute pass threshold are not permitted.

(7) ¹Examination performance must be marked as follows: if the minimum number of points required to pass the examination has been achieved, the mark is:

very good (“sehr gut”)	if at least 75%;
good (“gut”)	if at least 50 but less than 75%;
satisfactory (“befriedigend”)	if at least 25 but less than 50%;
sufficient (“ <i>ausreichend</i> ”)	if none or less than 25%

of the possible points above the minimum pass mark are attained. ²When calculating points, any half values shall be rounded in the candidate’s favour. ³If the candidate does not achieve the minimum number of points required to pass the examination, the mark is “failed” (“mangelhaft” (5.0)).

(8) ¹If the marking process reveals an unusual concentration of errors in the answers to specific questions, the examiner shall check the relevant questions immediately and before the examination results are announced determine whether they fail to meet the requirements set out in (2) Clause 1 above. ²The questions must be analysed post hoc. ³Item difficulty and item discrimination indices, reliability and distractor analysis can be used to review the quality of the questions asked. ⁴If this check shows individual questions to be flawed, the answers to these questions must be re-marked or

excluded when determining the examination result. ⁵The number of examination questions to be taken into account when calculating the examination result shall be reduced accordingly. ⁶The reduction in the number of examination questions must not be to the detriment of any candidates. ⁷If the number of points attainable for the examination questions that are to be eliminated is more than 20% of the total number of attainable points, the entire examination must be repeated. ⁸This shall also apply if only part of the examination is multiple choice.

(9) If only part of an examination is multiple choice, this Section (apart from (8) Clauses 7 and 8 above) shall only apply to the multiple-choice part.

Section 14: Language of examination

¹As a rule, module examinations and any components thereof shall be conducted in German, or in the case of the programme in management, economics and social sciences in English. ²If a module is conducted in a foreign language, the examination for that module shall also, as a rule, be conducted in that language and this shall be stated in the annexes.

Section 15: Registration for and admission to examinations

(1) ¹Admission to a module examination shall be granted if the examination candidate is enrolled in the respective bachelor degree programme at the University of Cologne or at a university with which a corresponding cooperation agreement exists, or is admitted as a second student, if the examination candidate has registered for the respective module examination in due time in accordance with (4) and, if applicable, fulfils further requirements in accordance with (2) and if there is no reason for refusal in accordance with (3).

(2) ¹Students may be asked to prove that they meet certain requirements before being admitted to a module examination. ²If these requirements relate to coursework, the coursework requirements are intended to ensure the acquisition of competencies and provide the teaching staff and students with an assessment of the students' learning progress. ³No mark is awarded for this coursework. ⁴If the required coursework requires the students to attend a course without a regular attendance prerequisite as per Section 9 (4), alternative coursework that does not require attendance should be accepted in justified special cases, provided that this alternative coursework facilitates the acquisition of competencies and measures learning outcomes in a manner equivalent to the original coursework. ⁵The required coursework usually takes the form of one of the following formats: electronic learning assessments, essays, exercises, assignments, short presentations, write-ups, written tests, research papers and similar formats. ⁶The requirements for admission to the respective module examinations are set out in the annexes.

(3) ¹Admission to a module examination shall be denied if the prerequisites according to (1) and (2) are not fulfilled, the module examination in the same or a recognisable equivalent module has already been passed at the University of Cologne, if a period for repetition has been missed or if it is

not possible to take the respective examination according to the provisions of the annex to these Examination Regulations. ²In addition, admission to a module examination shall be denied if the examination candidate has definitively failed an examination required according to the Examination Regulations in the chosen programme at a university within the scope of the Basic Law or if the examination candidate has lost their examination eligibility. ³Moreover, admission to an examination shall be denied if a candidate is on leave of absence pursuant to Section 48 (5) HG, unless one of the exceptional cases specified in Section 48 (5) Clause 4 and Clause 5 HG applies.

(4) ¹Candidates must register for each module examination; they are not entitled to participate in an examination or have their performance marked if they have not registered. ²As a rule, they must register for module examinations by no later than six weeks before the examination date. ³Notwithstanding this provision, Section 20 (5) shall apply. ⁴Together with the notification, the area of study (core, advanced, specialisation or supplementary module section) of the examination must be specified. ⁵If the area of study is divided into fields of study or groups, the field of study or group must also be specified. ⁶If the field of study or the group of the examination is transferred under the conditions specified in Sections 29, 30, 31 or 32, the module examinations are also transferred to the new field of study or group as stipulated in Sections 29, 30, 31 or 32. ⁷If not, any completed examinations are non-transferable.

(5) ¹The examination dates must be announced in an appropriate form when lectures commence for the semester and no later than nine weeks before the examination dates. ²The examination periods for oral examinations must be announced when lectures commence for the semester; the precise times of the examinations must be announced no later than a fortnight before the examinations. ³Students who have registered for an examination are entitled to take it during the examination period announced, except in cases of force majeure. ⁴Notwithstanding this provision, Section 20 (5) shall apply.

Section 16: De-registration, failure to attend and withdrawal from examinations

(1) ¹The Chair of the Examination Board shall announce the examination dates and times and the deadlines for de-registering from examinations no later than nine weeks before the respective examination dates in an appropriate form by means of a notice or on the Internet. ²Candidates can generally de-register from an examination up to a fortnight before the examination date in question without having to state their reasons.

(2) ¹If an examination candidate does not take part in a module examination set in terms of time and place without a valid reason or withdraws from the module examination without a valid reason after it has begun, the examination performance shall be deemed to have been assessed as “failed (5.0)” or “not passed”. ²The same applies if an examination performance is not completed within the specified processing time. ³If an examination is conducted electronically, the examination performance shall only be deemed to have been completed if the electronic transmission to the competent body has been fully completed by the end of the processing time. ⁴Section 19 (1) shall apply accordingly.

(3) ¹If a candidate fails to take part in an examination or withdraws from the examination after it has begun, the Chair of the Examination Board may, if there are good reasons, refrain from marking the examination performance as “failed (5.0)” or “not passed”. ²The reasons asserted for the failure to attend or withdrawal must be notified to the Chair of the Examination Board immediately in writing or by an electronic means of transmission provided and announced by the Examination Board on the website of the examination office and such reasons must be proven. ³The same applies if an examination performance is not completed within the specified processing time. ⁴In the event of illness, a medical certificate must be submitted. ⁵In cases of doubt, the submission of a medical certificate from a medical examiner may be requested; the costs shall be borne by the University. ⁶The same applies in the case of proven illness of a child to be cared for by an examination candidate or a spouse to be cared for, a registered partner, a direct relative and a relative by marriage in the first degree. ⁷The Examination Board shall regulate all further matters.

Section 17: Special examination arrangements and protective provisions

(1) The special needs of students with disabilities, chronic or mental illnesses and students who are subject to maternity protection regulations shall be taken into account in order to ensure equal opportunities for them.

(2) ¹If a candidate proves that they are not able to take part in an examination to the extent provided for due to prolonged or permanent illness or disability, they shall be granted special arrangements for disadvantages upon written request to the Chair of the Examination Board. ²They may be asked to present a certificate from a medical specialist. ³This shall also apply accordingly to deadlines and to compulsory attendance of courses and any required coursework.

(3) ¹Use of the protective provisions in accordance with the provisions of maternity protection law and in accordance with the deadlines of the Federal Parental Benefit and Parental Leave Act (Bundeselterngeld- und Elternzeitgesetz) in the currently valid version shall be made possible upon application; in these cases, module examinations may be taken despite leave of absence. ²If a candidate can prove that they will not be able to take part in an examination in the intended form or to the intended extent due to maternity protection regulations, they shall be granted special arrangements for disadvantages upon written application to the Chair of the Examination Board. ³They may be asked to present a certificate from a medical specialist. ⁴This shall also apply accordingly to deadlines and to compulsory attendance of courses and any required coursework. ⁵The application shall be submitted immediately after the requirements have been met.

(4) ¹Special needs arising when a spouse, registered partner, relative by direct descent or an immediate relative by marriage requires care must be taken into due consideration, especially with regard to deadlines, scheduling, examination dates and compulsory course attendance. ²Applications for such arrangements must be filed as soon as the special needs arise

(5) ¹Candidates must provide full reasons and suitable evidence to support applications of the type described in (1) to (4). ²Applications must be filed with the Chair of the Examination Board within

a reasonable amount of time before the examination. ³As far as a change in the clinical condition or disability is not to be expected, the special arrangements for disadvantages shall extend to all examinations to be taken in the programme and the acquisition of participation requirements.

Section 18: Assessment of examinations

(1) ¹Examinations shall be marked with a grade or the words “passed” (“bestanden”) or “not passed” (“nicht bestanden”) by the examiner. ²The following marks must be used:

1 = very good (“sehr gut”): excellent performance;

2 = good (“gut”): performance significantly higher than average requirements;

3 = satisfactory (“befriedigend”): performance in line with average requirements;

4 = sufficient (“ausreichend”): performance meets requirements despite some faults;

5 = failed (“mangelhaft”): performance does not meet requirements due to major faults.

³The marks can be increased or decreased by increments of 0.3 to provide a more differentiated assessment; the grades 4.3 and 4.7 are not permitted. ⁴The grades 1.0, 1.3, 1.7, 2.0, 2.3, 2.7, 3.0, 3.3, 3.7, 4.0 and 5.0 are permissible. ⁵Candidates who receive a mark of “sufficient (4.0)” or better or a “passed” are deemed to have passed the examination.

(2) ¹Any end-of-programme examinations of the programme governed by these regulations, any repeated examinations involving the possibility of a definitive failure and the bachelor thesis shall be marked by two examiners appointed by the Chair of the Examination Board. ²If an examination is assessed by two examiners, the mark is calculated as the arithmetic mean of the two examiners’ marks. ³Where there are two examiners and their individual marks are more than 1.0 mark apart or only one of them gives a “failed (5.0)”, the Chair of the Examination Board shall appoint a third examiner. ⁴In this case, the mark shall be calculated as the arithmetic mean of the three examiners’ marks; a mark of “sufficient (4.0)” shall be given, irrespective of the arithmetic mean, if at least two of the examiners’ marks are “sufficient (4.0)” or better. ⁵If at least two of the examiners’ marks are “failed (5.0)”, the examination shall be marked “failed (5.0)” irrespective of the arithmetic mean.

(3) If an examination that can only be marked “passed” or “failed” is marked differently by two different examiners, a third examiner shall be appointed to decide the final mark.

(4) ¹In the case of combined examinations of the type described in Section 12 (6), the student’s performance shall be marked as a whole. ²The mark given shall be in accordance with (1) above.

(5) Where written, oral, practical or combined examination types are combined with one another for module examinations, the examination shall be marked in accordance with the provisions set out in the annexes.

(6) ¹The marks for the core, advanced, supplementary and specialisation modules shall be calculated as the weighted arithmetic mean of the respective module marks in accordance with the weighting scheme shown in the annexes. ²In deviation from Clause 1, the marks for the modules listed in the following annexes are calculated as the weighted arithmetic mean of the respective module mark groups; in this case, the group marks are calculated as the weighted arithmetic mean of the respective module marks according to the weighting scheme shown in “Annex 1.3 Specialisation modules”, “Annex 2.2: Supplementary modules”, “Annex 3.3: Specialisation modules” and “Annex 4.3: Specialisation modules”. ³If certain examinations are not marked, the mark of the corresponding field of study or group considered in Clause 2 shall be calculated as the average of the marked examinations in this field of study; in this case, the weighting deviates from the weighting specified in the annexes. ⁴If all examinations are not marked, the mark of the corresponding field of study or group considered in Clause 2 shall not be calculated; instead, the field of study or group considered in Clause 2 shall be marked as passed, provided that all prerequisites of the field of study or group were acquired in the case of Clause 2. ⁵If every module examination required to successfully complete a field of study or group has not yet been completed or passed, a provisional mark for this field of study or group shall be calculated as the arithmetic mean of all marked module examinations.

(7) ¹The overall mark for the degree shall be calculated as the weighted arithmetic mean of the marks for the various modules and the mark for the bachelor thesis.

²The marks are weighted as follows to make up the overall mark of the degree programme in business administration:

- a) Mark for core and advanced modules: 108 of 168 CPs;
- b) Mark for supplementary modules: 18 of 168 CPs;
- c) Mark for specialisation modules: 30 of 168 CPs;
- d) Mark for bachelor thesis: 12 of 168 CPs.

³The marks are weighted as follows to make up the overall mark of the degree programme in social sciences:

- a) Mark for core and advanced modules: 78 of 168 CPs;
- b) Mark for supplementary modules: 24 of 168 CPs;
- c) Mark for specialisation modules: 48 of 168 CPs;
- d) Mark for bachelor thesis: 18 of 168 CPs.

⁴The marks are weighted as follows to make up the overall mark of the degree programme in economics:

- a) Mark for core and advanced modules: 84 of 168 CPs;
- b) Mark for specialisation modules: 72 of 168 CPs;

c) Mark for bachelor thesis: 12 of 168 CPs.

⁵The marks are weighted as follows to make up the overall mark of the degree programme in business informatics:

a) Mark for core and advanced modules: 75 of 168 CPs;

b) Mark for supplementary modules: 42 of 168 CPs;

c) Mark for specialisation modules: 39 of 168 CPs;

d) Mark for bachelor thesis: 12 of 168 CPs.

⁶The marks are weighted as follows to make up the overall mark of the degree programme in management, economics and social sciences:

a) Mark for core and advanced modules: 108 of 150 CPs;

b) Mark for specialisation modules: 30 of 150 CPs;

c) Mark for bachelor thesis: 12 of 150 CPs.

⁷If credits are transferred as per Section 11 (3) Clause 2, in such a way that there is no mark for a particular subject area, this subject area shall not be included in the calculation of the overall mark; the total number of credit points to be accumulated shall be reduced accordingly. ⁸If more modules are completed than specified in these Examination Regulations, the examination results passed in the compulsory modules and the examination results passed in the compulsory elective and elective modules are used to calculate the overall grade in chronological order according to the examination date stored in the campus management system. ⁹The other compulsory elective and elective modules passed are shown as additional examinations on the transcript of records.

(8) ¹Marks shall be given to one decimal place and used in this form for any further calculations; any other decimal places shall be discarded without being rounded. ²On the transcript of records, the overall mark for the degree shall be given to one decimal place. ³Any further decimal places shall be discarded without being rounded.

(9) The marks based on arithmetic means are as follows:

1.0 to 1.5 = very good ("sehr gut")

1.6 to 2.5 = good ("gut")

2.6 to 3.5 = satisfactory ("befriedigend")

3.6 to 4.0 = sufficient ("ausreichend")

Marks of more than 4.0 correspond to a "failed".

(10) If all of the marks as described in (7) above are “very good”, the overall mark given is “distinction” (“mit Auszeichnung”).

Section 19: Notification of examination results

(1) ¹As a rule, examination candidates shall be notified of the marks for their examinations within eight weeks by means of a public posting on the campus management system. ²Where examiners choose a different method of notification, their reasons for doing so must be documented. ³In the case of oral examinations, candidates shall be notified of their mark immediately after the examination.

(2) Candidates who have failed an examination at the final attempt shall be informed by means of a formal written notification sent to the postal address stored in the campus management system; the written notification shall include information on how to appeal.

Section 20: Resits of module examinations

(1) ¹Students can resit module examinations they have failed. ²Notwithstanding the provisions set out in Section 21 (16), the number of examination attempts per module shall be limited to three. ³More specific details are given in the annexes. ⁴In relation to all modules of the bachelor programme, for which the number of examination attempts is limited to three, students shall be granted a further three resit attempts in total. ⁵Candidates who have accumulated at least 140 credit points shall be granted a further additional attempt. ⁶If a candidate fails an examination in the three additional attempts and the extra attempt described in Clause 5, they are deemed to have failed the entire programme at the final attempt with the consequence of de-registration from the course of studies. ⁷The additional examination attempts in Clauses 4 and 5 do not apply to repetitions of the bachelor thesis.

(2) ¹If an examination candidate has failed a module examination for which the number of examination attempts according to (1) Clause 2 is limited to three for the third time, they shall be informed in writing by the Chair of the Examination Board whether it is possible to take additional examination attempts for this examination according to (1) Clauses 4 and 5. ²If the examination candidate is subsequently entitled to another additional examination attempt according to (1) Clauses 4 and 5, they shall receive separate notification of this.

(3) Additional examination attempts can only be granted for a module examination if none of the first three attempts in the respective module were failed due to cheating or an offence as described in Section 24.

(4) ¹Before retaking an examination for the first time as per (1), candidates are strongly advised to take advantage of the guidance opportunities available to them. ²To this end, the examination candidate shall receive a written invitation to seek advice, which also includes information about the advisory services that are available.

(5) ¹If a module examination consists of several components, the candidate must attain a pass (“bestanden”) or at least a “sufficient” (“ausreichend”, 4.0) mark in each of them. ²All module examination components marked “failed” (“mangelhaft”, 5.0) or “nicht bestanden”) must be retaken. ³Paragraphs (1) to (4) above shall apply accordingly to examination components.

(6) If requested by the examiner, the Chair of the Examination Board can specify a different type of examination or examination format for the resits.

(7) In the case of repeat examinations, the deadlines pursuant to Section 15 (4) and (5) may be deviated from in justified cases.

(8) The provisions concerning repetition of bachelor theses are set out in Section 21 (16).

(9) Students cannot resit module examinations that they have already passed.

Section 21: Bachelor thesis module

(1) The bachelor thesis is a form of examination in which the candidate writes a paper independently to show that they are capable of conducting academic work concerning and reflecting on a specific problem related to the subject matter covered in the programme, applying the necessary methods and within a specified period.

(2) ¹Students write their bachelor thesis during the programme. ²12 or 18 CPs respectively are awarded for the bachelor thesis. ³A student who has acquired at least 100 CPs, or 108 CPs in the programme in management, economics and social sciences, may apply to prepare the bachelor thesis.

(3) ¹In the business administration programme, the subject of the bachelor thesis must be taken from one of the areas: accounting and taxation, corporate development, finance, marketing or supply chain management, from interdisciplinary business administration or from general business administration. ²The prerequisite for admission to a bachelor thesis in one of the areas or in the area of interdisciplinary business administration according to Clause 1 is the successful completion of a bachelor seminar in the corresponding area or in the area of interdisciplinary business administration. ³The number of bachelor thesis topics to be issued can be limited for the individual examiner with the aim of realising an even distribution of bachelor theses according to subject area or the area of interdisciplinary business administration or general business administration.

(4) ¹In the social sciences programme, the topic of the bachelor thesis must be taken from one of the groups in the specialisation modules described in Section 30 (1). ²The number of bachelor thesis topics to be issued by each examiner can be limited in order to ensure an even distribution of bachelor theses among the specialisation modules and examiners. ³There is a compulsory thesis seminar, which contributes six credit points to the mark. ⁴The examination taken in the thesis seminar corresponds to the type defined in Section 12 (4). ⁵In good time before the start of each semester,

the examiner concerned specifies the thesis seminar conditions applicable to all bachelor theses registered in that semester.

(5) ¹In the economics programme, the topic of the bachelor thesis must clearly relate to the subject of economics and reflect the methods learned in the economics programme. ²The number of bachelor thesis topics to be issued by each examiner can be limited in order to ensure an even distribution of bachelor theses among the subjects and examiners.

(6) ¹In the business informatics programme, the topic of the bachelor thesis must clearly relate to the subject of business informatics. ²The number of bachelor thesis topics to be issued by each examiner can be limited in order to ensure an even distribution of bachelor theses among the subjects and examiners.

(7) The number of bachelor thesis topics to be issued by each examiner in the management, economics and social sciences programme can be limited in order to ensure an even distribution of bachelor theses among the subjects and examiners.

(8) ¹Group bachelor theses can be permitted if a clear distinction between, and assessment of, each candidate's contribution is possible. ²Objective criteria that make a clear distinction possible, such as sections, page numbers or topics, are used to indicate which student made which contribution. ³The total workload required of each group member must exceed the requirements for individual bachelor theses to an appropriate extent. ⁴The difficulty and content of a group thesis must meet the same requirements as for theses undertaken individually and independently. ⁵The contribution made by each individual must meet the requirements for bachelor theses.

(9) ¹The Chair of the Examination Board shall appoint an examiner in accordance with Section 23 (3) and commission them to set the topic of the bachelor thesis (topic setter). In addition, they shall appoint another examiner for a second assessment (second assessor). ²The examination candidate has the right to propose the topic setter. ³The topic, the two examiners and the deadline for submission are posted in the campus management system after the decision by the Chair of the Examination Board.

(10) ¹The processing time for the bachelor thesis shall be a maximum of twelve weeks. ²The processing period shall begin on the day on which the topic setter, who has been effectively appointed in accordance with (9), submits the topic to be processed and informs the examination candidate of this date; this date shall be communicated to the Chair of the Examination Board by the topic setter in writing or electronically. ³The content and scope of the topic of the bachelor thesis must be such that it can be prepared within the time limit according to Clause 1. ⁴Upon a justified written request or by an electronic transmission channel provided and announced by the Examination Board on the website of the examination office, the Chair of the Examination Board may grant a subsequent grace period of a maximum of four weeks in justified individual cases; the request must be submitted to the examination office in good time before the deadline expires. ⁵Such an individual case shall be deemed to exist in particular if there is a considerable restriction of the ability to perform which is relevant to the examination and which must be proven. ⁶The decision on the existence of a justified individual

case shall be made by the Chair of the Examination Board. ⁷If there is an important reason, an application for withdrawal from the examination performance in the bachelor thesis module can be submitted to the Chair in writing or via an electronic transmission channel provided and announced by the Examination Board on the website of the examination office; the application must be submitted to the examination office in good time before the deadline for submission. ⁸An important reason of this kind exists in particular if a justified individual case according to Clause 5 prevents preparation of the bachelor thesis for more than two months and this is proven. ⁹When submitting the thesis again, a new topic must be prepared.

(11) ¹The bachelor thesis must be written in German; in the management, economics and social sciences programme, the bachelor thesis must be written in English. ²Alternatively, candidates can apply for permission from the Chair of the Examination Board to write the bachelor thesis in a different language; this permission requires the approval of the topic setter; furthermore, it must be ensured that the thesis can be assessed.

(12) ¹The provisions of good scientific practice shall apply to the preparation of the bachelor thesis. ²The bachelor thesis may not have been submitted in the same or similar form as part of another examination. ³If this provision is violated, the thesis shall be deemed to have been assessed as “failed (5.0)”. ⁴The decision shall be made by the Examination Board.

(13) ¹The bachelor thesis contains a list of the aids used. ²In addition, it must be accompanied by a signed declaration with the following wording: “I hereby declare in lieu of an oath that I have written this thesis independently and without the use of aids other than those indicated. All passages taken verbatim or in spirit from published and unpublished external writings are marked as such. The work has not yet been submitted in the same or a similar form in the context of another examination. I confirm that the submitted electronic version corresponds completely to the submitted printed version.” ⁴If, according to the decision of the Examination Board, the bachelor thesis is to be submitted exclusively in electronic form to the examination office in accordance with (14), the last sentence of the declaration shall be omitted. ⁴If the affirmation in lieu of an oath is made falsely, the legal consequences according to the Criminal Code may apply.

(14) ¹The bachelor thesis must be submitted to the examination office in due time in duplicate – a printed and hard-bound copy as well as an electronic version in portable document format (PDF) protected against unintentional alteration; the date of submission must be documented. ²The Examination Board may determine that, in deviation from Clause 1, the bachelor thesis is to be submitted to the examination office only in an electronic version in portable document format (PDF) protected against unintentional alteration. ³If the bachelor thesis is not submitted in due time, it shall be deemed to have been assessed as “failed (5.0)”. ⁴When submitting the bachelor thesis, the examination candidate must be enrolled in the corresponding degree programme or be admitted as a second student.

(15) ¹As a rule, examination candidates shall be notified of the mark for their bachelor thesis within eight weeks of the date on which they submitted it; this notification takes the form of a public posting on the campus management system. ²Where examiners choose a different method of notification, their reasons for doing so must be documented.

(16) ¹Candidates who receive a “failed (5.0)” for their bachelor thesis can repeat the thesis component once with a new topic. ²They must register for the second attempt within six months of the result of the first attempt being announced. ³Candidates who fail to comply with this deadline are deemed to have failed the bachelor degree at the final attempt unless they prove that the reasons for their failure to comply were beyond their control. ⁴The provisions of Section 17 shall remain unaffected. ⁵Second repeats of failed bachelor thesis components and repeats of passed bachelor thesis components are not permitted. ⁶If a candidate fails their first repetition of the bachelor thesis, they shall definitively fail the programme.

(17) ¹Candidates who have failed the bachelor thesis shall be informed by means of a formal written notification sent to the postal address stored in the campus management system. ²The written notification shall include information on how to appeal.

Section 22: Examination Board

(1) The Faculty of Management, Economics and Social Sciences shall elect an Examination Board to organise the examinations of the degree programmes regulated by these Examination Regulations and the tasks assigned by these Examination Regulations.

(2) The Examination Board shall consist of the following ten members, who shall have voting rights:

1. the Chair, from among the core teaching staff (“Hochschullehrerinnen und Hochschullehrer”);
2. five further members from among the core teaching staff;
3. one member from among the associated teaching staff (“akademische Mitarbeiterinnen und Mitarbeiter”);
4. one member from among the technical and administrative staff;
5. two members from among the student body.

(3) The Examination Board shall elect a Deputy Chair from among the members specified in (3) No. 2 above.

(4) ¹For the members according to (2) Nos. 2 to 5, one deputy each shall be elected. ²The deputies shall act if the members from the respective group are prevented from attending.

(5) ¹The Chair can invite other persons, particularly deputy members, to the Examination Board meetings if this appears useful and if the majority of the voting members present are not opposed. ²If a decision only concerns students of the business informatics programme or the application or objection of a student from the business informatics programme, the head of the examination office for the

mathematics bachelor programme of the Faculty of Mathematics and Natural Sciences of the University of Cologne shall be consulted by the Chair of the Examination Board to its meeting at which a decision is made on this matter.

(6) ¹The members and deputies as per (3) Nos. 2 to 5 shall be elected in separate groups by the Faculty Council. ²The groups shall be entitled to make nominations. ³The members in the core teaching staff ("Hochschullehrerinnen und Hochschullehrer") group, the associated teaching staff ("akademische Mitarbeiterinnen und Mitarbeiter") and the technical and administrative employee group shall be elected for three years, the members in the student group for one year. ⁴Re-election is permitted. ⁵Deputy members' appointments shall end when the appointment of the member they represent ends. ⁶Should a member or a deputy as per (3) Nos. 2 to 5 leave the Examination Board before the end of their appointment, a successor shall be elected for the remainder of their appointment.

(7) ¹The Examination Board shall constitute a quorum if the Chair or the Deputy Chair and at least five other voting members are present. ²If the Deputy Chair chairs a meeting because the Chair is prevented from attending, the Deputy Chair shall attend the meeting as a voting member in accordance with (4). ³The Examination Board shall decide by a simple majority of those present and entitled to vote. ⁴In the event of a tie, the Chair shall have the casting vote. ⁵The members of the Examination Board from the group of employees in technology and administration shall only have the right to vote in matters of teaching insofar as they perform corresponding functions in the University and have special experience in the respective area; such experience shall be assumed in particular if the employee meets the status of an examiner according to Section 65 (1) Clause 2 HG. ⁶The Chair shall decide on the existence of these requirements at the beginning of the member's term of office and, in cases of doubt, the Rectorate. ⁷The members from the student group shall only vote on pedagogical-scientific decisions if they meet the status of an examiner according to Section 65 (1) Clause 2 HG.

(8) ¹The Examination Board shall ensure that the provisions of these Examination Regulations and the annexes are complied with. ²Unless otherwise specified in these Examination Regulations, the Examination Board shall decide what action is to be taken, in particular, with regard to objections to decisions taken in the examination process. ³The Examination Board shall report regularly to the Faculty, at least once a year, on developments regarding the bachelor degrees and how long students take to complete the programmes; it shall present breakdowns of the overall marks and put forward proposals concerning possible amendments to these Examination Regulations. ⁴Without prejudice to the examiners' powers, the Examination Board shall specify what aids are allowed to be used in examinations and shall inform students accordingly by means of a notice.

(9) ¹The meetings of the Examination Board shall not be public and shall generally be held in person. ²The Chair may decide that the meeting shall be held by electronic communication. ³The decision shall become invalid if half of the members of the Examination Board object to it before the meeting. ⁴For meetings by electronic communication, the Chair may also decide that resolutions shall be passed by electronic communication; this may be deviated from by a resolution of the Examination Board. ⁵Paragraph (7) Clause 1 shall apply to meetings by electronic communication with the proviso that attendance means participation in the meeting. ⁶Resolutions may also be passed by circulation,

provided no member objects. ⁷The members and their deputies shall be bound by official secrecy. ⁸If they are not in public service, they shall be bound to secrecy by the Chair.

(10) ¹The members of the Examination Board and their deputies are entitled to attend examinations. ²They are not entitled to be present during the discussion of the mark to be awarded.

(11) ¹The Examination Board can use the services of the examination office of the Faculty of Management, Economics and Social Services to assist in the organisation of examinations. ²The manager or deputy manager of the Faculty's joint examination office shall be consulted at all of the Examination Board's meetings.

(12) ¹The Chair of the Examination Board, or the Deputy Chair if the Chair is prevented from doing so, shall represent the Examination Board, convene the meetings of the Examination Board, chair these meetings and implement the resolutions passed there. ²The Examination Board may delegate the performance of its duties to the Chair for all regular cases. ³In case of urgency, the Chair may conduct a vote by circular resolution. ⁴The Chair may take decisions that cannot be postponed instead of the Examination Board; the Examination Board shall be informed of such decisions without delay; the Examination Board may revoke the decision; rights of third parties that have already arisen shall remain unaffected. ⁵The Examination Board reserves the right to decide on appeals. ⁶A protocol shall be drawn up for each meeting of the Examination Board.

(13) The Chair of the Examination Board shall announce by means of a legally binding notice or other suitable means any directives, important dates and deadlines and any other information from the Examination Board that does not concern specific individuals only.

Section 23: Examiners, observers, electronic plagiarism checks

(1) ¹Examiners shall be appointed from among the University's core teaching staff and the persons pursuant to Section 65 (1) HG. ²Examinations may only be marked by persons who themselves have at least the qualification to which the examination leads or an equivalent qualification. ³Examiners who have resigned, been relieved of their duties or retired may be reappointed as examiners for a period of one year after the end of the semester in which they left the University of Cologne. ⁴Only persons who have obtained a relevant degree of at least at bachelor standard or an equivalent qualification may be appointed as an observer.

(2) ¹The Examination Board shall appoint the examiners and the observers. ²It may delegate the appointment to the Chair. ³The appointment of examiners and observers shall be recorded in the records. ⁴Notwithstanding the provisions in Clauses 1 and 2, the following shall apply: a lecturer shall be the examiner for the course for which they are responsible and which they conduct, unless the Examination Board or the Chair appoints a different examiner.

(3) ¹The Chair of the Examination Board shall appoint the examiners responsible for the bachelor thesis module from among the professors, adjunct professors, honorary professors, junior professors and private lecturers of the Faculty as well as other examiners who are members of the

Faculty of Management, Economics and Social Sciences and who fulfil the requirements according to Section 65 (1) HG. ²Examiners who have left the University of Cologne and examiners who have been relieved of their duties or retired may be reappointed as examiners for the bachelor thesis for a period of one year after the end of the semester in which they left the University of Cologne. ³The Examination Board may extend this period on request if there are good reasons to do so. ⁴It can assign this decision to the Chair. ⁵The appointment of examiners for the bachelor thesis shall be documented.

(4) ¹The examiners shall specify the tools and aids permitted in the examinations that they conduct and shall inform the candidates accordingly in a suitable manner and in good time, no later than when the dates of the examinations are announced.

(5) ¹If so decided by the Examination Board in a resolution that is then announced, written examination papers can be checked electronically to determine whether they include any copied text that has not been marked as such. ²In these cases, the candidates must also submit their examination papers in electronic form and declare that the written and electronic versions are the same. ³The electronic checking described in Clause 1 includes the use of written examination papers for comparison with the written examination papers of third parties to determine whether their content is related. ⁴The decision described in Clause 1 must specify:

- a) which examinations can be checked electronically;
- b) whether the Examination Board should engage the services of an administrative assistant for this purpose and who should take on this role;
- c) the file format and the place and method of submission of the electronic version;
- d) the criteria for selecting the examinations to be checked, and;
- e) how long the electronic versions may be used.

⁵Notwithstanding a) above, electronic checking shall always be permitted if there are reasonable grounds to suspect the candidate has cheated. ⁶Notwithstanding e) above, the period of use shall end no later than the point at which the archiving period for the examination file ends as per Section 26 (4). ⁷Any other use of the electronic version by examiners or the Examination Board is not permitted without the candidate's consent. ⁸The result of an electronic check may only be used as the basis of a decision to fail a student if it has been confirmed by the examiners responsible for the examination.

(6) ¹Examiners and observers shall not be influenced by third parties in their examination work. ²They shall be bound by a confidentiality obligation. ³Those of them who are not civil servants shall be sworn to secrecy by the Chair of the Examination Board.

Section 24: Cheating and offences

(1) ¹If an examination candidate attempts to influence the assessment of an examination performance by deception for their own or another's advantage, if they carry aids that are not permitted in the examination or if they commit academic misconduct in the performance of the examination, they shall be deemed to have committed an act of cheating. ²Unauthorised aids may be confiscated by the invigilators after completion of the examination, which the examination candidate is entitled to terminate, with the consent of the examination candidate for the purpose of preserving evidence.

(2) ¹Depending on the seriousness of the act of cheating under (1), the Examination Board shall pronounce one of the following sanctions against the examination candidate:

- a) a warning;
- b) the examination candidate shall be required to repeat the examination performance to which the act of cheating relates;
- c) the examination performance to which the act of cheating relates shall be deemed to have been assessed as "failed (5.0)" or "not passed";
- d) the examination to which the act of cheating relates is declared definitively failed;
- e) the examination candidate is excluded from taking further examinations, whereby their examination eligibility in the degree programme is forfeited.

²A serious violation shall be considered in particular in cases of the use of unauthorised aids, the (attempted) exertion of influence on the examiner or, in cases of plagiarism, in which sources are deliberately concealed by reformulating the original texts, rearranging the syntax or using synonyms. ³An especially serious case shall be considered in particular in the case of an elaborate use of technical aids such as Internet-capable mobile telephones, repeated acts of cheating in different examinations, the organised collaboration of several persons, the adoption of an entire work of another person as one's own performance, the falsification of scientific work or the sabotage of examination work and the research work of others. ⁴The sanction chosen shall be noted in the examination file. ⁵In the case of combined, inter-faculty or inter-university degree programmes, other examination offices, faculties or universities may be informed of this.

(3) In particular in the event of a reasonable suspicion of plagiarism, the Examination Board may perform additional verifications – including electronic verifications – without the permission of the candidate.

(4) As a consequence of an act of cheating in accordance with (1), the relevant coursework shall be deemed not to have been completed.

(5) ¹Whoever disturbs the taking of an examination may be issued a warning by the respective examiners or invigilators. ²If the warnings are ineffective or if the disruption is serious, the examination candidate may be excluded from further performance of the examination. ³In this case, the Examination Board may assess the examination performance as "failed (5.0)" or "not passed". ⁴The reasons for the exclusion shall be documented.

(6) ¹If a candidate attempts to influence the result of an examination when given access to their marked papers, the mark originally given by the examiner shall continue to apply. ²In addition, one of the repeat attempts specified in Section 20 (1) Clause 2 shall be forfeited. ³In extremely serious or repeated cases, the Examination Board can also declare the bachelor degree to have been completely failed.

(7) ¹Prior to a decision by the Examination Board, the examination candidate shall be granted a legal hearing. ²The examination candidate shall be informed of the decision in writing without delay, the reasons for the decision shall be stated and the candidate shall be informed of the right of appeal.

(8) ¹In addition, offences can be punished in accordance with Section 63 (5) HG. ²Any person who intentionally attempts to influence the result of an examination for the benefit of another person shall also be deemed to have acted in breach of the Examination Regulations.

Section 25: Invalid examinations and revocation of bachelor degrees

(1) ¹If a candidate was admitted to an examination despite not meeting the requirements but was not guilty of deceit, and if this does not become known until after the final transcript of records has been presented, this error shall be deemed to have been corrected by the student's passing the examination. ²If the candidate gained admission to the examination wrongfully and intentionally, the Examination Board shall decide what legal action is to be taken, taking into account the provisions of the Administrative Procedure Act of the Federal State of North Rhine-Westphalia (Verwaltungsverfahrensgesetz des Landes Nordrhein-Westfalen, VwVfG NRW).

(2) If an examination candidate has cheated in an examination and this fact only becomes known after the certificate has been issued, the Examination Board may subsequently withdraw the assessment for the examination in which the examination candidate cheated, subject to the conditions of Section 48 VwVfG NRW, and impose a sanction in accordance with Section 24 appropriate to the seriousness of the act of cheating.

(3) Bachelor degrees can be revoked if it becomes apparent that they were obtained deceitfully or if key requirements for the awarding of bachelor degrees were erroneously deemed to have been met.

(4) ¹Candidates must be given the opportunity to make a statement prior to the decisions described in (1) to (3) above being made. ²Responsibility for the decision lies with the Examination Board, which makes its decision taking into account the provisions of VwVfG NRW. ³Once five years have passed since the date on the final transcript of records, decisions are no longer possible.

(5) ¹The incorrect final transcript of records and all incorrect attachments must be returned to the University and, where appropriate, new ones issued. ²If the student is deemed to have failed the entire programme, the Faculty shall revoke the student's degree and demand the return of their certificate.

Section 26: Examination file and access to files

(1) ¹The Examination Board shall keep an examination file for each candidate. ²In particular, the file shall document the candidate's examination attempts, their examination papers, the examiners' reports on said papers, the examination records, examination results, calculations of marks and copies of the final transcript of records and certificates.

(2) Candidates can enquire about their examination results at any time, provided the necessary arrangements can be made.

(3) ¹Once an examination result has been announced, each candidate or a person authorised by the candidate may, on written request, be granted access to their examination paper for the examination in question and to the report and corrections made by the examiners or, in the case of oral examinations, to the examination record. ²As part of this access, the candidate or their representative must have the opportunity to make copies or photographs of the documents; any model solutions may not be copied or photographed, since they are not part of the candidate's examination record. ³All other details regarding the access procedure, including a reasonable deadline for requesting access, shall be specified by the Examination Board. ⁴Once the deadline for requesting access has passed, access shall only be granted if the candidate can prove that their failure to comply with the deadline was due to reasons beyond their control. ⁵Candidates do not have any further rights of access.

(4) ¹With the exception of the provisions in Clause 2, the examination file shall be kept until the end of the fifth year following exmatriculation from the degree programme and shall be offered to the competent archives after expiry of the deadline; if the archives refuse to accept it, it must be destroyed. ²Written examination documents shall be offered to the archives for two years from the date of notification of the assessment, unless a legal dispute is pending; this shall apply accordingly to electronic versions; if the archives refuse to accept them, they must be destroyed. ³The academic degrees awarded and a catalogue of the final transcripts of records and certificates presented may be recorded in a register until the end of the 50th year after the student finishes the programme; the first half sentence of Clause 1 applies accordingly.

(5) ¹Examination questions, correction notes and examiners' reports of which a student becomes aware may not be passed on to third parties or published if they are protected by copyright. ²The thesis prepared by a student may only be published with the corresponding consent if a blocking notice has been agreed. ³This shall be without prejudice to justified interests in legal protection, for example in the form of disclosure to a commissioned lawyer.

Section 27: Completion of the programme and documents issued upon completion

(1) ¹The programme is deemed to have been successfully completed when the candidate has passed all of the required examinations and gained the necessary credit points in accordance with Section 5. ²Candidates who pass the degree shall be issued with a final transcript of records. ³The final transcript of records shall be signed by the Chair of the Examination Board and shows the overall

mark awarded for the bachelor degree, the marks awarded for each area of study, as well as the mark and title of the bachelor thesis, and the name of the topic setter. ⁴Marks shall be stated in both words and numbers. ⁵The date on the transcript is the date on which the last examination was taken or the credit for an examination was transferred. ⁶If the bachelor thesis is the last examination component, the date on the transcript will be the date on which the thesis was submitted. ⁷An English copy of the final transcript of records shall also be issued. ⁸Only the German version shall be legally binding.

(2) ¹Students shall be presented with a bachelor certificate along with the final transcript of records to certify that the degree specified in Section 3 has been awarded; the certificate shall bear the same date as the final transcript of records. ²The bachelor certificate shall be signed by the Dean of the Faculty and the Chair of the Examination Board and marked with the Faculty's seal.

(3) ¹In addition to the final transcript of records and the bachelor degree certificate, successful students shall be presented with a diploma supplement in German and English, with information about the subject matter covered by the completed programme and the academic and professional qualifications gained through the degree. ²The diploma supplement gives a description of the programme completed by the student. ³The transcript of records is a component of the diploma supplement. ⁴Candidates may request an overview of marks that illustrates the relative placement of their final mark within their programme. ⁵The parameters which determine this overview, including the reference group of each student, shall be determined by the Examination Board.

(4) ¹If a candidate has failed at the final attempt or dropped out of the programme or if they change university, they can be issued a transcript of records on request, which shows the examinations taken, any additional academic work, their marks and credit points earned. ²This transcript must make it clear that the holder has not passed or has definitively not passed the programme.

Section 28: Transitional provisions

(1) ¹These Examination Regulations shall apply to all students enrolled for the first time or re-enrolled, having interrupted their studies covered by these Examination Regulations, or those admitted as second students at the University of Cologne from the 2021/2022 winter semester onwards.

(2) ¹Students already enrolled or admitted as second students on a bachelor programme in business administration or social sciences or economics or business informatics at the University of Cologne on 30 September 2021 can continue their studies on the basis of these Examination Regulations; credit for examinations already taken shall be transferred. The application for transfer must be submitted to the Chair of the Examination Board in writing; the transfer cannot be reversed. ³The further details regarding a transfer shall be defined by the Examination Board.

Section 29: Credit points for and scope of the bachelor degree in business administration

(1) In addition to the bachelor thesis (12 CPs) and the Studium Integrale (12 CPs), the bachelor degree includes:

1. the core and advanced modules, carrying 108 CPs;
2. the supplementary modules, carrying 18 CPs, and;
3. the specialisation modules, carrying 30 CPs.

(2) ¹In the core and advanced modules as per (1) No. 1 above, candidates must earn 108 CPs. ²The detailed examination procedure is set out in the annex. ³Students effectively decide on an elective compulsory module the first time they take an examination in that module; a failure to attend as defined in Section 16 (2) does not revoke this effective decision. ⁴If the student fails an examination for the first time in a given module, it is possible to change the module; this change requires the written consent of the Chair of the Joint Examination Board. ⁵Candidates who fail an examination in a module twice can no longer change module. ⁶Changing another module is excluded.

(3) ¹In the supplementary modules as per (1) No. 2 above, candidates must earn 18 CPs. ²The detailed examination procedure is set out in the annex. ³Students effectively decide on their module the first time they take an examination in that module; a failure to attend as defined in Section 16 (2) does not revoke this effective decision. ⁴If the student fails an examination for the first time in a given module, it is possible to change the module; this change requires the written consent of the Chair of the Joint Examination Board. ⁵Candidates who fail an examination in a module twice can no longer change module. ⁶Changing another module is excluded.

(4) ¹In the specialisation modules as per (1) No. 3 above, candidates must earn 30 CPs. ²The notice to take an examination in the specialisation modules according to (1) No. 3 may be provided once at least 45 CPs have been attained. ³The detailed examination procedure is set out in the annex. ⁴Students effectively decide on their module the first time they take an examination in that module; a failure to attend as defined in Section 16 (2) does not revoke this effective decision. ⁵If the student fails an examination for the first time in a given module, it is possible to change the module; the change requires the written consent of the Chair of the Joint Examination Board. ⁶Candidates who fail an examination in a module twice can no longer change module. ⁷Changing another module is excluded.

Section 30: Credit points for and scope of the bachelor degree in social sciences

(1) In addition to the bachelor thesis (18 CPs) and the Studium Integrale (12 CPs), the bachelor degree includes:

1. the core and advanced modules, carrying 78 CPs;
2. the supplementary modules, carrying 24 CPs, and;

3. the specialisation modules with the political science or sociology and social psychology groups, carrying 48 CPs.

(2) ¹In the core and advanced modules as per (1) No. 1 above, candidates must earn 78 CPs.

²The detailed examination procedure is set out in the annex.

(3) ¹In the supplementary modules as per (1) No. 2 above, candidates must earn 24 CPs. ²The detailed examination procedure is set out in the annex. ³Students effectively decide on their module the first time they take an examination in that module; a failure to attend as defined in Section 16 (2) does not revoke this effective decision. ⁴If the student fails an examination for the first time in a given module, it is possible to change the module; this change requires the written consent of the Chair of the Joint Examination Board. ⁵Candidates who fail an examination in a module twice can no longer change module. ⁶Changing another module is excluded.

(4) ¹In the specialisation modules as per (1) No. 3 above, candidates must earn 48 CPs. ²The notice to take an examination in the specialisation modules according to (1) No. 3 may be provided once at least 48 CPs have been attained. ³The detailed examination procedure is set out in the annex. ⁴Students effectively decide on their module the first time they take an examination in a module in the respective group; a failure to attend as defined in Section 16 (2) does not revoke this effective decision. ⁵Upon submission of a request to the Chair of the Joint Examination Board, a change of group is possible twice in total. ⁶Candidates who fail an examination in a module of the group twice can no longer request such a change; this change is likewise not possible after candidates have taken examinations in two modules of a group in more than one semester; a failure to attend as defined in Section 16 (2) does not provide exemption from this provision. ⁷If a module has already been successfully completed in the group to be changed by the candidate, and this module can be taken by the candidate elsewhere in their programme, the module shall be transferred upon the request of the candidate; failed attempts shall be transferred ex officio if the student takes the module again. ⁸This request must be submitted together with the request to change group. ⁹Submission of this request at a later time is excluded. ¹⁰Changing a completed group is excluded. ¹¹A further change is excluded. ¹²Students effectively decide on their module the first time they take an examination in that module; a failure to attend as defined in Section 16 (2) does not revoke this effective decision. ¹³If the student fails an examination for the first time in a given module, it is possible to change the module; this change requires the written consent of the Chair of the Joint Examination Board. ¹⁴Candidates who fail an examination in a module twice can no longer change the module. ¹⁵Changing another module is excluded.

Section 31: Credit points for and scope of the bachelor degree in economics

(1) In addition to the bachelor thesis (12 CPs) and the Studium Integrale (12 CPs), the bachelor degree includes:

1. the core and advanced modules, carrying 84 CPs;

2. the specialisation modules with the economics, business administration or social sciences fields of study, carrying 72 CPs.

(2) ¹In the core and advanced modules as per (1) No. 1 above, candidates must earn 84 CPs. ²The detailed examination procedure is set out in the annex. ³Students effectively decide on their module the first time they take an examination in that module; a failure to attend as defined in Section 16 (2) does not revoke this effective decision. ⁴If the student fails an examination for the first time in a given module, it is possible to change the module; this change requires the written consent of the Chair of the Joint Examination Board. ⁵Candidates who fail an examination in a module twice can no longer change the module. ⁶Changing another module is excluded.

(3) ¹In the specialisation modules as per (1) No. 2 above, candidates must earn 72 CPs. ²The notice to take an examination in the specialisation modules according to (1) No. 2 may be provided once at least 42 CPs have been attained. ³The detailed examination procedure is set out in the annex. ⁴Students effectively decide on a field of study the first time they take an examination in that field of study; a failure to attend as defined in Section 16 (2) does not revoke this effective decision. ⁵Upon submission of a request to the Chair of the Joint Examination Board, a change of field of study is possible twice in total. ⁶Candidates who fail an examination in a module of the field of study twice can no longer request such a change; this change is likewise not possible after candidates have taken examinations in three modules of a field of study in more than one semester; a failure to attend as defined in Section 16 (2) does not provide exemption from this provision. ⁷If a module has already been successfully completed in the field of study to be changed by the candidate, and this module can be taken by the candidate elsewhere in their programme, the module shall be transferred upon the request of the candidate; failed attempts shall be transferred ex officio if the student takes the module again. ⁸This request must be submitted together with the request to change field of study. ⁹Submission of this request at a later time is excluded. ¹⁰Changing a completed field of study is excluded. ¹¹A further change is excluded. ¹²Students effectively decide on their module within the social sciences programme the first time they take an examination in a module of the respective field of study; a failure to attend as defined in Section 16 (2) does not revoke this effective decision. ¹³Upon submission of a request to the Chair of the Joint Examination Board, a change of field of study is possible twice in total. ¹⁴Candidates who fail an examination in a module of the field of study twice can no longer request such a change; this change is likewise not possible after candidates have taken examinations in two modules of a field of study in more than one semester; a failure to attend as defined in Section 16 (2) does not provide exemption from this provision. ¹⁵If a module has already been successfully completed in the field of study to be changed by the candidate, and this module can be taken by the candidate elsewhere in their programme, the module shall be transferred upon the request of the candidate; failed attempts shall be transferred ex officio if the student takes the module again. ¹⁶This request must be submitted together with the request to change field of study. ¹⁷Submission of this request at a later time is excluded. ¹⁸Changing a completed field of study is excluded. ¹⁹A further change is excluded. ²⁰Students effectively decide on their module the first time they take an examination in that module; a failure to attend as defined in Section 16 (2) does not revoke this effective decision. ²¹If the student fails an examination for the first time in a given module, it is possible to change the module; this change requires the written consent of the Chair of the Joint Examination Board. ²²Candidates who fail an examination in a module twice can no longer change the module. ²³Changing another module is excluded.

Section 32: Credit points for and scope of the bachelor degree in business informatics

(1) In addition to the bachelor thesis (12 CPs) and the Studium Integrale (12 CPs), the bachelor degree includes:

1. the core and advanced modules, carrying 75 CPs;
2. the supplementary modules, carrying 42 CPs, and;
3. the specialisation modules, carrying 39 CPs.

(2) ¹In the core and advanced modules as per (1) No. 1 above, candidates must earn 75 CPs.

²The detailed examination procedure is set out in the annex.

(3) ¹In the supplementary modules as per (1) No. 2 above, candidates must earn 42 CPs. ²The detailed examination procedure is set out in the annex. ³Students effectively decide on their elective compulsory module the first time they take an examination in that module; a failure to attend as defined in Section 16 (2) does not revoke this effective decision. ⁴If the student fails an examination for the first time in a given module, it is possible to change the module; this change requires the written consent of the Chair of the Joint Examination Board. ⁵Candidates who fail an examination in a module twice can no longer change module. ⁶Changing another module is excluded.

(4) ¹In the specialisation modules as per (1) No. 3 above, candidates must earn 39 CPs. ²The notice to take an examination may be provided once at least 48 CPs have been attained. ³The detailed examination procedure is set out in the annex.

Section 33: Credit points for and scope of the bachelor degree in management, economics and social sciences

(1) In addition to the bachelor thesis (12 CPs) and the Studium Integrale (12 CPs), the bachelor degree includes:

1. the core and advanced modules, carrying 108 CPs;
2. the supplementary modules, carrying 18 CPs, and;
3. the specialisation modules, carrying 30 CPs.

(2) ¹In the core and advanced modules as per (1) No. 1 above, candidates must earn 108 CPs.

²The detailed examination procedure is set out in the annex.

(3) ¹In the supplementary modules as per (1) No. 2 above, candidates must earn 18 CPs. ²The detailed examination procedure is set out in the annex.

(4) ¹In the specialisation modules as per (1) No. 3 above, candidates must earn 30 CPs. ²The notice to take an examination in the specialisation modules as per (1) No. 3 may be provided once at least 45 CPs have been attained. ³The detailed examination procedure is set out in the annex. ⁴Students effectively decide on their elective compulsory module the first time they take an examination in that module; a failure to attend as defined in Section 16 (2) does not revoke this effective decision.

⁵If the student fails an examination for the first time in a given module, it is possible to change the module; this change requires the written consent of the Chair of the Joint Examination Board. ⁶Candidates who fail an examination in a module twice can no longer change module. ⁷Changing another module is excluded.

Section 34: Publication and entry into effect

(1) These Examination Regulations shall be published in the Official Notices (Amtliche Mitteilungen) of the University of Cologne.

(2) These Examination Regulations shall enter into effect on 1 October 2021.

Article II

Prepared on the basis of the resolutions of the Faculty Council of the Faculty of Management, Economics and Social Sciences dated 22 June 2020 and following review of the lawfulness by the Rectorate on 8 December 2020.

Cologne, 28 January 2021

signed:

The Dean
of the Faculty of Management, Economics and Social Sciences
of the University of Cologne
University Professor Dr Ulrich W. Thonemann

Overview of annexes

Annex 1.1: Core and advanced modules of business administration

Annex 1.2: Supplementary modules of business administration

Annex 1.3: Specialisation modules of business administration

Annex 1.4: Bachelor thesis in business administration

Annex 1.5: Studium Integrale

Annex 1.6: Subject-specific annex for the Bachelor of Science in Business Administration

Annex 2.1: Core and advanced modules of social sciences

Annex 2.2: Supplementary modules of social sciences

Annex 2.3: Specialisation modules of social sciences

Annex 2.4: Bachelor thesis in social sciences

Annex 2.5: Studium Integrale

Annex 2.6: Subject-specific annex for the Bachelor of Science in Social Sciences

Annex 3.1: Core and advanced modules of economics

Annex 3.2: Specialisation modules in the field of study of business administration

Annex 3.3: Specialisation modules in the field of study of social sciences

Annex 3.4: Specialisation modules in the field of study of economics

Annex 3.5: Bachelor thesis in economics

Annex 3.6: Studium Integrale

Annex 3.7: Subject-specific annex for the Bachelor of Science in Economics

Annex 4.1: Core and advanced modules of business informatics

Annex 4.2: Supplementary modules of business informatics

Annex 4.3: Specialisation modules of business informatics

Annex 4.4: Bachelor thesis in business informatics

Annex 4.5: Studium Integrale

Annex 4.6: Subject-specific annex for the Bachelor of Science in Business Informatics

Programme: Bachelor of Science in Business Administration

Annex 1.1: Core and advanced modules of business administration

The examination candidate must attain 108 CPs in the core and advanced modules according to Section 29 (1) No. 1.

Programme: Bachelor of Science in Business Informatics

Annex 4.1: Core and advanced modules of business informatics

The examination candidate must attain 75 CPs in the core modules according to Section 32

(1) No. 1.

Module	CP	P/WP	CP target
BM Informatik [Informatics]	6	P	75
AM Informatik I [Informatics I]	9	P	
AM Informatik II [Informatics II]	9	P	
BM Wirtschaftsinformatik I [Business Informatics I]	6	P	
BM Wirtschaftsinformatik II [Business Informatics II]	6	P	
AM Wirtschaftsinformatik [Business Informatics]	9	P	
BM Mathematik (Wirtschaftsinformatik) [Mathematics (Business Informatics)]	12	P	
BM Grundlagen der Betriebswirtschaftslehre [Principles of Business Administration]	12	P	
AM Statistik und Ökonometrie [Statistics and Econometrics]	6	P	

Annex 4.2: Supplementary modules of business informatics

The examination candidate must attain 42 CPs in one group in the supplementary modules according to Section 32 (1) No. 2.

Module	CP	P/WP	CP target	
BM Accounting I	6	WP	30	42
BM Corporate Development I	6	WP		
BM Finance I	6	WP		
BM Marketing I	6	WP		
BM Supply Chain Management I	6	WP		
BM Unternehmens- und Wirtschaftsethik [Corporate and Economic Ethics]	6	WP		
BM Entscheidungstheorie [Decision Theory]	6	WP		
SM Media and Technology Management I	6	WP		
SM Media and Technology Management II	6	WP		
Studies Abroad I	6	WP		
Studies Abroad II	6	WP		
EM Wirtschaftsinformatik I [Business Informatics I]	6	WP	12	
EM Wirtschaftsinformatik II [Business Informatics II]	6	WP		
Studies Abroad in Information Systems	6	WP		

Annex 4.3: Specialisation modules of business informatics

The examination candidate must attain 39 CPs in the specialisation modules according to Section 32 (1) No. 3.

Module	CP	P/WP	CP target	
Programmierpraktikum [Programming Practical]	9	P	33	39
SM Informatik [Informatics]	9	P		
SM Wirtschaftsinformatik [Business Informatics]	15	P		
Bachelorseminar Wirtschaftsinformatik [Bachelor Seminar in Business Informatics]	6	P	6	

Annex 4.4: Bachelor thesis in business informatics

Module	CP	P/WP	CP target
Bachelor Thesis in Business Informatics	12	P	12

Annex 4.5: Studium Integrale

Module	CP	P/WP	CP target
Studium Integrale	12	P	12

Annex 4.6: Subject-specific annex for the Bachelor of Science in Business Informatics

Programme: Bachelor of Science in Management, Economics and Social Sciences

Annex 5.1: Core and advanced modules of management, economics and social sciences

The candidate must earn 108 CPs in the core modules.

Module	CP	P/WP	CP target
BM Entrepreneurship	6	P	108
BM Fundamentals of Microeconomics	6	P	
BM Economy and Business in Nature	6	P	
AM Economics of Climate Change	6	P	
BM Introduction to Statistics	6	P	
BM Introduction to Psychology	6	P	
BM Fundamentals of Macroeconomics	6	P	
BM Demography and Social Inequality	6	P	
AM Economics of Inequality	6	P	
BM Data Analysis and Econometrics	6	P	
BM Managing Demand and Supply	6	P	
BM Economic Design	6	P	
BM Digital Transformation und Entrepreneurship	6	P	
AM Digital Transformation and Change Management	6	P	
BM Data Science	6	P	
BM Business Ethics	6	P	

BM Public Policy	6	P	
BM Finance and Accounting	6	P	

Annex 5.2: Supplementary modules of management, economics and social sciences

The candidate must earn 18 CPs in the supplementary modules.

Module	CP	P/WP	CP target
Studies Abroad I (WiSo)	6	P	18
Studies Abroad II (WiSo)	6	P	
Studies Abroad III (WiSo)	6	P	

Annex 5.3: Specialisation modules of management, economics and social sciences

The candidate must earn 30 CPs in the specialisation modules.
