1 Economics

Economics is a subset of economic science. It is concerned with microeconomic behaviour and macroeconomic conditions as well as processes and examines, for example, how private households react to rising prices or how companies respond to higher non-wage labour costs. It deals with the socially relevant, fundamental problem of how scarce production facilities and resources should be managed and proposes solutions. The Bachelor in Economics programme gives students the necessary knowledge and skills to be able to systematically describe economic problems and identify solutions for them.

1.1 Content and objectives of the programme

Graduates have competences at level 6 of the German Qualification Framework or the Bachelor level of the German Qualification Framework for Higher Education Qualifications. Intended learning outcomes are shown in the table below. On the one hand, the intended learning outcomes comprise the overarching *learning goals* that the programme envisions for the graduates. On the other hand, they include *learning objectives*, which refer to concrete activities of the students during their studies.

	Graduates act
	with sound economic expertise to analyse macroeconomic or microeconomic contexts for state or private institutions.
(0	Students apply basic theories and concepts of economics in economic contexts.
al skills	Students analyse basic interrelationships in sociological, political science or business management context – if they choose a corresponding study track.
Inalytic	as active users of economic methods and concepts in order to support individual economic decisions or institutional processes in a data-based and analytical manner.
e pr	Students use mathematical and statistical methods of analysis and representation.
Professional and analytical skills	Students apply mathematical and statistical methods of analysis and representation to prepare solutions to problems in economic contexts.
rofessi	with a profound understanding of economics in order to develop differentiated assessments of microeconomic or macroeconomic decisions.
ā	Students develop theory-based solutions for economic problems.
	Students write a paper on an economic topic on the basis of systematised academic literature and data material.
cative ative s	as effective communicators for economic phenomena in order to deliberatively shape decision-making in state or private institutions.
Communicative and cooperative skills	Students discuss their own results in an economic context with teaching staff, other students and representatives of external fields of action in German and English.
C O	Students work purposefully within diverse teams.
skills	as self-reflective and ethically sensitised decision-makers in economic contexts in order to have a positive impact on societal challenges.
Personal skills	Students design their learning and action processes independently, assess them after self- reflection and reflection by others and implement identified development potentials.
Pers	Students act responsibly and academically in economic practice and under consideration of ecological, social, ethical and/or economic criteria.

valid for students of the ER 2021 (enrolment from winter semester 2021/22)

Students on the Bachelor in Economics programme learn core competencies that can be used for a variety of purposes in economic life. Primarily, these competencies include economic and formal analytical skills with which to analyse microeconomic and macroeconomic issues in modern economies. This special methodological competence is what sets graduates with an economic background apart from those in other fields of study.

Depending on students' personal priorities, various career paths are open to them, working for economic actors at home and abroad. These include, for example, private or public sector enterprises, various ministries and departments at the national, federal-state and local level, research institutes, foundations, trade unions, associations and chambers. These employers offer job opportunities for graduates, who analyse complex economic contexts in order to obtain information and draw up forecasts and recommendations regarding restrictions to market access, agreements on the exchange of goods and services, pricing principles, market interdependencies and consequences of regulatory intervention.

The specific profile of these graduates is defined by a solid knowledge of formal microeconomic and macroeconomic as well as econometric analysis methods in combination with specific areas of application, such as the labour, energy or capital market. The profile is further differentiated by the choice of a track, Economics, Business Administration or Social Sciences.

1.2 Requirements

English language level B2 according to the Common European Framework of Reference for Languages (CEFR) is required when applying for the B.Sc. Economics. Moreover, successful students will have the following subject-related, methodical and personal strengths and aptitudes:

- good mathematical and analytical skills,
- ability to think abstractly and conceptually,
- good communication skills in German and English,
- ability to perform independent, goal-driven and result-oriented work and
- a keen interest in economic issues.

Students are recommended to attend a preparatory module in mathematics which is offered in blocked form before the regular lectures begin. For further information, have a look in the corresponding module description.

1.3 Programme structure and sequence

The Bachelor in Economics programme carries 180 credit points (CPs). The standard period of study is six terms. Students can choose between three tracks and should make their decision in the third term. The programme comprises the following subject categories:

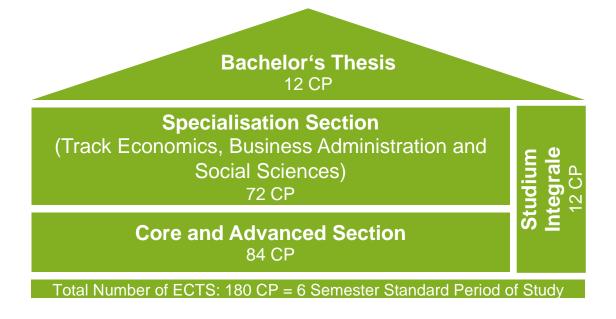

The core and advanced section (84 CPs) consist of modules in fundamental economics and methods. The specialisation section (72 CPs) has different tracks: Economics, Business Administration and Social Sciences.

The track "Economics" has a specialisation section in Economics including two seminar modules. Additionally, three modules can be chosen from e.g. Business Administration, Political Science, Psychology, Law, Information Systems, Economic Geography.

The track "Business Administration" includes core modules and specialisation modules in Business Administration as well as specialisation modules in Economics.

The specialisation section of the "Social Sciences" track consists of modules in Political Science as well as modules in Sociology and Empirical Social Research. Students have to choose between Political Science or Sociology (including Empirical Social Research). Further CPs have to be attained in Economics and in two modules from e.g. Business Administration, Psychology, Law, Information Systems, Economic Geography.

The third section is the "Studium Integrale", carrying 12 CPs, which all students at the university are required to take. The students then complete the programme by writing their bachelor's thesis (12 CPs).

1.4 Study Abroad Option

The WiSo Faculty offers a broad range of study abroad options within an excellent network of prestigious partner universities worldwide. The so-called Study Abroad Programme (STAP) includes ERASMUS exchanges and provides an opportunity for a single-term stay at one of the WiSo Faculty's partner universities. Successful STAP applicants benefit from direct contact and organisational support at the partner university as well as support in the organisation of the semester abroad by the <u>International Relations Center (ZIB WiSo)</u>. Additionally, they are exempt from paying tuition fees there. The range of universities available depends on the bachelor course on which the student is enrolled – the possible options are listed in the <u>WiSo Exchange (WEX)</u> (access through the student's UoC account only), along with detailed information on each university.

Every year, in addition to the STAP programme, the WiSo Faculty organises an exclusive short-term study option WiSo@NYC which takes place in New York City.

In addition to these options offered by the Faculty, bachelor students can also apply for a non-WiSo exchange, offered by Dezernat 9 – Internationales (Central International Office of the University of Cologne) within the 'fakultätsübergreifende Partnerschaften' framework. Further possibilities are going abroad as a freemover (i.e. as a student who organises his or her stay abroad individually) or participating in short courses or summer schools offered under separate terms and conditions.

1.4.1 The Faculty's Study Abroad Programme (STAP)

Bachelor students should plan their application for a term abroad at the beginning of their bachelor studies. The STAP main selection round takes place once a year with application period between December and January 15th, it allows for an application either for fall term or spring term of the following academic year. Detailed information on the selection criteria and the best preparation for a STAP application can be found online in the <u>STAP Bachelor Application Manual</u>.

If there are still places available after the main selection round has been completed, another small secondary selection round will be offered between April and June 1st. In this round, students can only apply for the following spring term.

STAP Bachelor - main selection round (fall term and spring term)

* Alternative offer: if no offer can be given at one of the five preferred universities and if slots at other universities are available. ** End of main selection round. In case any exchange slots become available after 15 March, these slots will be made available in a secondary selection

STAP Bachelor – secondary selection round (for spring term only)

15 APRIL	1 JUNE	END OF JUNE	MID-JULY	MID-JULY	MID-JULY	END OF JULY	15 AUGUST
APPLICATION PERIOD* RESULTS AND ACCEPTANCE PERIOD							
Beginning of STAP application	Application deadline All applications	Outcome 1: Offer	Deadline for acceptance				
period	have to be submitted via WEX	Contraction of the local division of the loc		Handing in of new preference list	Selection result based on new preference list	Deadline for acceptance	
		Outcome 3: No offer					Last possible dat for receiving an offer

* Deadline for handing in FILTERtest results (if taken until 1 June): 15 June. ** Alternative offer: if no offer can be given at one of the five preferred universities and if slots at other universities are available.

1.4.2 Credit transfer options from studies abroad

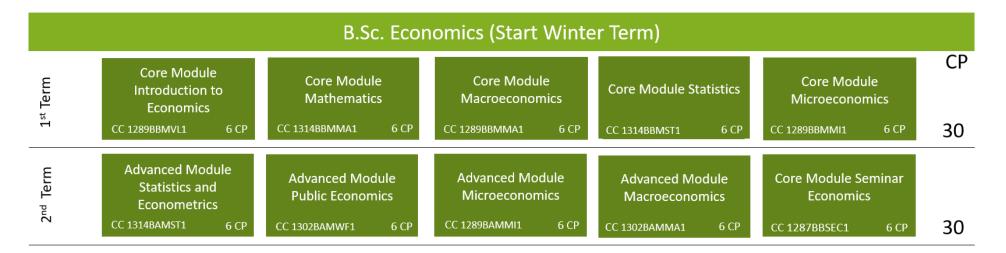

The WiSo Faculty has put a lot of emphasis on internationalisation in the design of its bachelor programmes, offering broad credit transfer options for all kinds of study abroad options. Each bachelor course includes at least one "Studies Abroad" module, with a broad range of courses suitable for credit transfer. In addition, a single course-to-course credit transfer can be considered. Moreover, students have the option of crediting courses from the semester abroad as part of their Studium Integrale.

For any questions regarding credit transfer, students can contact the <u>ZIB WiSo</u> or the <u>WiSo</u> <u>Credit Transfer Center</u>.

1.5 Module study plan sequences

Due to several factors you need to plan your studies more and more individually. This is caused for example by the fact that some modules are solely offered in the winter or summer term. Thus, the following sequences are only recommendations, from which you can or have to diverge depending on your individual study plan.

valid for students of the ER 2021 (enrolment from winter semester 2021/22)

Study plans including a semester abroad

a) Track: Economics, Business Administration, Social Sciences (Sociology), Social Sciences (Political Science)

The fifth semester is mostly suitable for studying abroad.

In view of the model study plan sequence and the credit transfer options in the specialisation section (18 CPs) and in the Studium Integrale (12 CP), Credit Points in the recommended modules can be transferred.

b) General remarks

For questions about studying abroad the <u>ZIB WiSo</u> is at your disposal.

Additionally, it is always possible not to request a semester on leave (*Urlaubssemester*) if you spend a semester abroad such that examinations can be taken upon return to the University of Cologne (if it is individually feasible).

1.6 Modules with mid-term examinations

Some modules have courses that only run for half a term and usually with twice the normal number of classes. For these modules, the term is divided into two roughly equal halves. In fall, the mid-term usually ends at the beginning of December; in spring, it is usually in the middle or at the end of May. Often, the examinations for these courses are held mid-term, enabling students to reduce their examination load at the end of term.

The information in the campus management system (KLIPS) regarding the dates of courses and examinations is relevant in this context.

1.7 Calculation of the overall mark

The marks for each examination are determined by the respective examiners. The overall mark for the bachelor degree combines the marks for the various sub-categories, weighted based on the respective number of credit points attainable and each sub-category's contribution towards the overall mark for the examinations for which marks are given. The marks for the sub-categories are calculated as the mean of the examination results in line with the weighting for each examination in terms of the credit points it contributes to the overall mark for the examinations in the respective category for which marks are given. If the result of a module examination is calculated based on several components, the mark is calculated based on a weighting given in the module description. The overall mark for the degree is calculated as the weighted arithmetic mean of the marks for the subject categories and the mark for the bachelor's thesis. On the Economics programme, the weighting for the contributions to the overall mark are as follows:

- a) Mark for Core and Advanced Section: 84 of 168 CPs
- b) Mark for Specialisation Section: 72 of 168 CPs
- c) Mark for Bachelor's Thesis: 12 of 168 CPs.

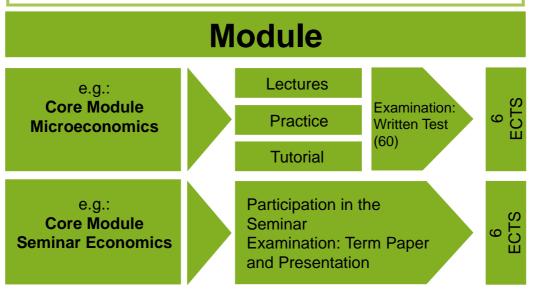

1.8 Modularity

The subject categories on the bachelor programmes are divided into modules, the contents of which are presented in the module descriptions. The bachelor module catalogue can be viewed in the <u>download section</u> of the WiSo faculty website. Students who pass the necessary examinations are awarded credit points as proof of their successful participation in a module. The module examinations are taken at regular intervals during the programme. Each module consists of various parts and can usually be completed in one or two terms (see the "Duration" section in the module description). A module can consist of lectures, exercises and/or tutorials on the same subject. There are also modules that only comprise one type of class, e.g. a seminar. In some cases, modules offer students a choice between various courses and they are required to take one or more of them. In these cases, In these cases, the examination can refer to the content of one or of several courses.

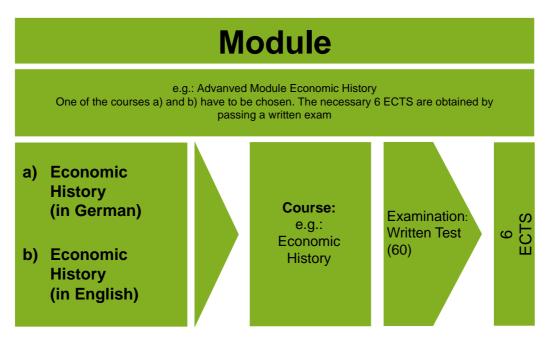

When planning your studies, please remember that not every module is offered every term. To find out whether a module is being offered, refer to the "Module availability" section of the module description.

The following examples are to be understood exclusively as illustrations of the individual scenarios; they do not necessarily include modules of the present study programme.

Scenario 1: The module can consist of one teaching and learning method or several complementary teaching and learning methods on the same topic.

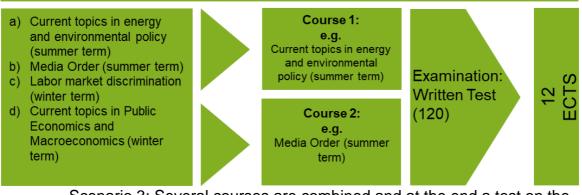

Scenario 2: One of the two courses must be chosen and the exam must be passed.

valid for students of the ER 2021 (enrolment from winter semester 2021/22)

Module

e.g.: Specialisation Module Current Topics in Economics Two of the four courses have to be chosen. The necessary 12 ECTS are obtained by passing a written exam (120) covering the content of the two chosen courses.

Scenario 3: Several courses are combined and at the end a test on the contents of these courses is completed successfully and the ECTS are thus acquired.

1.9 Rules for failed attempts

Students may retake module examinations that they have failed. The number of attempts is limited to three per module.

In addition, additional three resit attempts can be granted to students at any point of the programme. Students who have accumulated at least 140 credit points are granted a further additional attempt. If a student fails an examination in the three additional attempts and the extra attempt for students with 140 points or more, they are deemed to have failed the programme at the final attempt. However, students may only be eligible for additional attempts beyond the initial three attempts if none of the first three examination attempts were failed due to cheating or to an offence. If the candidate fails a module examination three times, he or she will receive a written notification informing him or her of the options available. We recommend all students who fail the initial three attempts to seek advice from WiSo-Student Service Point before embarking upon an additional attempt.

Where a module examination consists of several components, the candidate must obtain a "bestanden" (pass) mark, or at least an "ausreichend (4,0)" (sufficient) mark, in all of the examination components. All components marked "mangelhaft (5,0)" or "nicht bestanden" (fail) must be retaken.

It is not possible to resit module examinations that have already been passed.

A failed bachelor's thesis can be retaken once, with a new topic. Students must register for their second attempt within six months of the result of their first attempt being announced.

2 Support for students

2.1 Course registration in KLIPS 2.0

<u>KLIPS 2.0</u> is the central campus management system of the University of Cologne. At the WiSo faculty, KLIPS 2.0 serves as a student organization tool. Students should use it as an online course catalogue, for registration and deregistration of courses and examinations, as well as an overview of the complete study programme and calendar. Information on current dates and deadlines of the WiSo faculty, as well as video tutorials and FAQs about KLIPS can be found on the homepage of <u>WiSo-KLIPS-Support</u>. If you have further questions, feel free to contact WiSo-KLIPS-Support via <u>e-mail</u> (klips-wiso@uni-koeln.de). For account questions, contact the central <u>KLIPS support</u>.

2.2 Exam registration in KLIPS 2.0

Examinations on the various programmes are always managed via KLIPS 2.0. Students must register for them within specified deadlines. Please note that registration for courses <u>without</u> restriction on participation via KLIPS and registration for the corresponding module examinations are two completely separate processes. In the case of courses which are subject to a restriction on participation, an examination registration is generally only possible if a registration for the course has been submitted beforehand. Most examinations in written test form are offered twice per term. Often, this will be to "space out" the dates, i.e. students can choose the date that best fits their examination schedule. In some cases, however, the second examination may be a genuine repetition of the first, depending on the department/institute concerned.

All WiSo Faculty examination candidates are entitled to see their examination papers after they have been marked. For more information, please visit the <u>WiSo Examination Office website</u>.

2.3 Subject-specific and examination advice

General advice for students, especially regarding study options and programme requirements, is available from <u>WiSo-Student Service Point (WiSSPo)</u> for all programmes at the WiSo Faculty. The WiSSPo also offers subject-specific recommendations for students' study plans for the first semester plus information on how the individual programmes are structured. It issues transcripts of records in German and English as well as ranking certificates. The

valid for students of the ER 2021 (enrolment from winter semester 2021/22)

WiSSPo is also the first contact point students should refer to if they have any other questions or problems concerning their studies. The centre can be contacted by telephone, in person or by email. The opening hours and contact data can be found on the corresponding webpage.

Subject-specific advice is provided during the designated times by the University's faculty members and associated teaching staff ("akademische Mitarbeiterinnen und Mitarbeiter") involved in the teaching on the programme. The designated times are announced by means of notices in the institutes and on the departments'/institutes' websites.

Legally binding information concerning examinations and examination procedures is provided by the <u>WiSo Faculty Examination Office</u>. It also issues letters of assignment to the appropriate term of the programme. All the necessary information, contact details and opening hours can be found on the corresponding webpage.

2.4 Academic Working

Students who seek support with academic writing of term and final papers, which goes beyond the Core Module Seminar Economics, can participate in various courses offered by the University of Cologne to practice the process of academic writing. These include:

a) Writing advice/consultation

The <u>Kompetenzzentrum Schreiben</u>, the <u>Professional Center</u>, the <u>Kölner Studierendenwerk</u> and the programme <u>SchreibArt</u> offer advice as well as courses related to the issues that arise when writing an academic paper.

b) Literature research

The <u>university library</u> offers various courses especially for researching literature.

c) Text processing and literature administration

The <u>Regionales Rechenzentrum</u> provides courses regarding text processing and literature administration.

Students can register for the courses of the Professional Center and the SchreibArt programme in the **Studium Integrale** under "Kompetenzen für das Studium" (competencies for studies). There are even more offers made by the WiSo-faculty that can be elected in the **Studium Integrale**. Hence, these courses can be credited for your studies.

2.5 Other sources of information and advice

International students who study at the WiSo Faculty for part of their programme can turn to the <u>International Relations Centre</u> ("Zentrum für Internationale Beziehungen" or "ZIB") for help with any questions they have. Cologne University students preparing to study abroad can also contact the ZIB for support. The Centre also runs a variety of summer schools, short programmes and Business English courses. The services, courses and people to contact can be found on the corresponding webpage.

The Faculty's <u>Credit Transfer Centre</u> ("Zentrum für die Anrechnung auswärtiger Leistungen") is responsible for recognising credits accumulated in other institutions. This applies both to credits students have gained at other higher education institutions in Germany or abroad prior to studying at the WiSo Faculty, and to (advance) transfer of credits that students plan to accumulate abroad or have already accumulated abroad as part of a WiSo Faculty programme. This system eliminates the need to make individual inquiries to departments/institutes and examination offices. Students can find out everything they need to know about the transfer process on the corresponding webpage.

The <u>WiSo Career Service</u> offers advice and support for students from the WiSo Faculty looking for an internship or profession that is right for them. It also helps them as they plan their career and apply for jobs. In addition, the WiSo Career Service organises seminars, presentations and special events in cooperation with employers and external and internal experts. It also works with other partners in the Faculty and the University to support and guide students as they decide on a career path.

The <u>WiSo IT Service</u> runs regular courses dealing with standard software and field-specific programs.

In case of study-related or personal difficulties, the <u>psychosocial counselling</u> ("Psycho-Soziale Beratung") of the Kölner Studierendenwerk can be called upon. In addition to psychological and social counselling, it also offers writing and learning counselling and support for pregnant women and students with children.

As a further offer, there is <u>Nightline</u> Cologne, the listening and information telephone of students for students. It is available to all students at Cologne universities and colleges.

The WiSo student council represents the interests of all students from the WiSo faculty. In addition to advice from fellow students it also provides a variety of useful services for studying at the WiSo faculty. Any information can be found at <u>wiso-buero.uni-koeln.de</u> or by directly writing an email to <u>wiso-buero@uni-koeln.de</u>.

3 Module tables and descriptions

3.1 Core and Advanced Section

In accordance with Section 31(1), No. 1 of the Examination Regulations, students must accumulate 84 CPs in the Core and Advanced Section.

3.3 Studium Integrale

All of the Faculty's bachelor programmes include an interdisciplinary component, known as the Studium Integrale, in which students accumulate 12 credit points. The Studium Integrale is a university-wide and interdisciplinary component of the courses of study in which academic and professional competences are imparted. The Studium Integrale has both theoretical and practical content, enabling students to focus on more academic aspects or topics related to their future careers enhancing their employability. It aims to teach and develop skills that go beyond subject-specific knowledge or that are related to basic academic and personal traits: scientific curiosity, systematic and analytical thinking, and ability to deal with complexity, a solution-minded outlook plus other abilities such as teamwork and foreign language skills.

The Studium Integrale courses are run jointly by the faculties and the University's Professional Centre. They enable students to pursue their own interests in more depth, gain an insight into other subjects and departments, attend courses dealing with issues of relevance to society, acquire skills relevant to their future careers and attend language classes. The "Universitas" segment offers formats especially designed for the Studium Integrale, such as lecture series on societal issues with related workshops. In addition, the Studium Integrale offers students assistance with their learning and studying, helping them with such questions as how to write an academic paper or how to conduct literature reviews. Periods of training abroad and work experience can also be credited in the Studium Integrale. The Studium Integrale carries 12 credit points in total and formally counts as a module. There is no restriction on the number of attempts possible for Studium Integrale examinations.

Any credit points attained in the Studium Integrale over and above the 12 credit points specified in the study structure are shown on the transcript of records.

3.4 Bachelor's Thesis

The bachelor's thesis carries 12 CPs and is written at the end of the programme. Its aim is to illustrate that the candidate is capable of working and reflecting independently on a specific problem related to the subject matter covered on the programme, using the necessary methods and within a specified period. On the Economics programme, the topic of the bachelor's thesis must be significantly related to Economics and must reflect methods learned during the programme. Group bachelor's theses can also be permitted if a clear distinction between and assessment of each candidate's contribution is possible. Objective criteria that make a clear distinction possible, such as sections, page numbers or topics, are used to indicate which student made which contribution. The total workload required for a group thesis must exceed that required for an individual bachelor's thesis to an appropriate extent. The difficulty and content of a group thesis must meet the same requirements as for theses undertaken individually and independently. The contribution made by each individual must meet the requirements for bachelor's theses.

To be allowed to register for the bachelor's thesis component, candidates must have acquired at least 100 credit points. In line with the number of credit points it carries, the workload allotted for the thesis is 360 hours, i.e. 12 weeks. Bachelor's theses should not be more than 40 pages long. Candidates who have earned all of the necessary credit points, except for the bachelor's thesis, must register within a period of one year to write their bachelor's thesis. Further and more detailed information concerning bachelor's theses can be found in the examination regulations.

There is no central registration for the Bachelor's thesis. The registration takes place after agreement of the supervision at the individual chairs and/or institutes. The supervision process differs between the supervisors. Information will be provided at the individual chairs or institutes. You will find a central overview of the providers in the Economics area in KLIPS. It is advisable to initiate support in the pre-semester. The Bachelor's seminar is neither a prerequisite for the Bachelor's thesis nor is there any entitlement to supervision based on participation in a specific Bachelor's seminar.

Courses Ecological Econo	omics		Contact Hours 45h	Self- Studies 135h	Course Language English	
Module Content This module covers selected issues in ecological economics, i.e. the economics relevant to "space ship Earth". Ecological economics recognises the finiteness of the planet regarding physical (material and energy) resources and limits to absorptive capacities within ecosystems. The module includes natural science foundations, especially the laws of thermodynamics and their relevance for economics. It covers the role of energy conversion in wealth creation, and the role of entropy production in environmental impacts. Implications regarding energy and environmental regulation are discussed.						
Learning Objectives Students analyse (current) questions and challenges within the framework of pre-structured contexts. communicate continuously and purposefully within teaching and learning groups. communicate in English. develop an understanding of the impact of decisions that take into account environmental, economic, social and/or ethical criteria.

1	Courses Inequality and In	tergeneration	al Mobility	Contact Hours 45h	Self- Studies 135h	Course Language English		
2	Module Content This module will revolve around questions distributional inequality and inequality of opportunity. The first aim is to learn about some of the theoretical models and empirical stylized facts related inequality and intergenerational mobility. Second, students are supposed to gain a better understanding of the mechanics through which inequality is generated within and across generations. Ideally, the module brings students to the frontier of this important research field and enables them to form an opinion about which policies might be appropriate to fight intergeneration cycles of poverty.

2	This module wil The first aim is inequality and in understanding o generations. Ide enables them to	Module Content This module will revolve around questions distributional inequality and inequality of opportunity. The first aim is to learn about some of the theoretical models and empirical stylized facts related to inequality and intergenerational mobility. Second, students are supposed to gain a better understanding of the mechanics through which inequality is generated within and across generations. Ideally, the module brings students to the frontier of this important research field and enables them to form an opinion about which policies might be appropriate to fight intergeneration cycles of poverty.						
3	Learning Objectives Students analyse (current) questions and challenges within the framework of pre-structured contexts. establish and evaluate independently developed positions. question and critically reflect on current social developments.
