1 Business Administration

Business administration deals with the economic context and conditions within which individual companies operate and provides information about company structures and processes. The subject matter covered and researched is derived from the various issues that companies face. The bachelor's programme in Business Administration gives students the knowledge and skills needed to find optimal solutions to such issues.

1.1 Content and Objectives of the Programme

Graduates have competences at level 6 of the German Qualifications Framework respectively the Bachelor level of the German Qualifications Framework for Higher Education Qualifications. Intended learning outcomes are shown in the table below. On the one hand, the intended learning outcomes comprise the overarching *learning goals* that the programme envisions for the graduates. On the other hand, they include *learning objectives*, which refer to concrete activities of the students during their studies.

	Graduates act...
Professional and analytical skills	...with sound management expertise to analyse complex business processes in depth.
	<i>Students apply basic methods and techniques of business accounting or mathematical or statistical methods.</i>
	<i>Students describe business theories and concepts or theories and concepts of related disciplines.</i>
	...as active users of economic and management methods and concepts in order to support business processes in a data-based and analytical manner.
	<i>Students apply business management statements and business management knowledge to known and unknown problem areas.</i>
	<i>Students independently write an academic paper on a selected topic relevant to business administration on the basis of literature and data material.</i>
Communicative and cooperative skills	...as interculturally and ethically sensitised team players in order to work successfully in diverse teams.
	<i>Students work in a goal-oriented and cooperative manner in diverse teams.</i>
	...as effective communicators of management problems in order to view business challenges from different perspectives and thus enable new ways to solve them.
	<i>Students discuss subject-specific problems in German or English.</i>
	<i>Students defend their independently developed position or solutions to problems.</i>
Personal skills	...as independent and self-reflective decision-makers in order to have a positive impact on the world with its many challenges.
	<i>Students develop an understanding of the impact of economic decisions taking into account ecological, social and/or ethical criteria.</i>
	<i>Students assess their action process and identify potential for development.</i>

In addition to business administration, the programme includes aspects of economics, social sciences and other interdisciplinary areas (information systems, law, etc.) and qualifies graduates for demanding, high-level specialist jobs in business administration that provide opportunities for promotion to management positions. Job opportunities for graduates (direct entry or trainee programmes) can be found in companies in all economic segments, including manufacturing, trade, logistics, energy, finance, the public sector and the entire service sector. Various areas of industry provide graduates with numerous pathways into employment in case handling and project management after a short period of induction training. Potential roles vary depending on functional area and company sector/size and are increasingly project-based due to market dynamics. Graduates can be employed in a wide variety of positions along a company's business process chain. Roles are dependent on the graduate's individual skill set and, in some cases, professional experience in the area concerned. Graduates can find appropriate employment opportunities in almost all economic sectors and forms of enterprise, assuming that any necessary specialised or job-specific abilities can be acquired "on the job", building on the skills learned in the bachelor programme. All graduates from the bachelor's programme in Business Administration at Cologne benefit from a strong foundation in theory and typical patterns of action, covering an exceptionally broad range of functions in the field of business administration. Analysis of interrelationships between functional areas of businesses and conceptual understanding of value chains are key skills, which graduates are capable of expressing in quantitative form too. They are able to express, justify and discuss business decisions and their own standpoints and recommendations for action and to use them for problem-solving. In keeping with academic tradition, critical reflection of one's own actions, those of others and the social relevance and responsibility of companies and business also feature strongly in the graduate profile. Integrated within the programme is the opportunity to make choices based on individual future plans.

In addition, students can deepen and expand their specialist and scientific knowledge in a master's programme and thus specialise in specific occupational fields.

1.2 Requirements

English language proficiency at B2 level according to the Common European Framework of Reference for Languages (CEFR) is required when applying for this degree programme. Successful students will have the following subject-related, methodical and personal strengths and aptitudes:

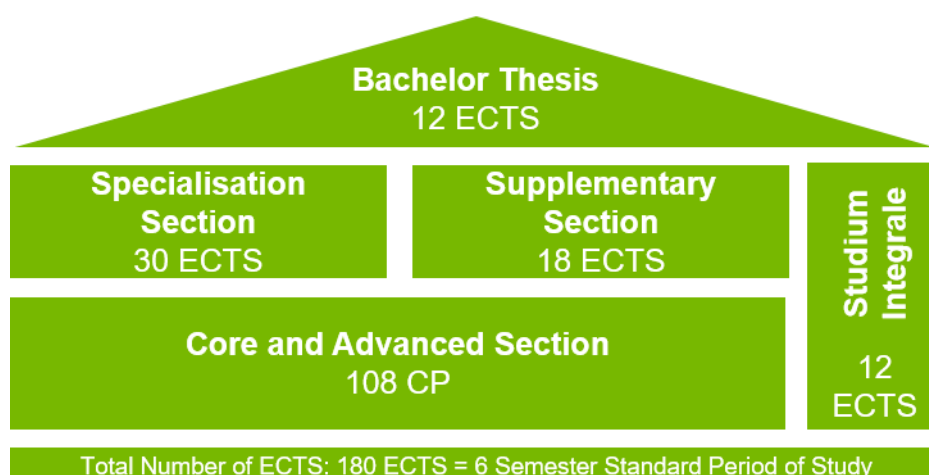

- good mathematical and analytical skills,
- ability to think abstractly and conceptually,
- good communication skills in German and English,
- ability to perform independent, goal-driven and result-oriented work,
- a keen interest in economic issues.

Students with insufficient knowledge in mathematics (e.g. only basic course in high school) are recommended to attend a preparatory module in mathematics which is offered in blocked form before regular lectures begin. For further information, please see the corresponding module description.

1.3 Programme Structure and Sequence

The bachelor's in Business Administration programme consists of 180 credit points (CPs) with six semesters as the standard period of study. The programme is made up of the following components:

- the Core and Advanced Section (108 CPs): basic modules in Business Administration, Economics and Methods. All modules in this section are compulsory.
- the Supplementary Section (18 CPs): supplementary and in-depth modules in Business Administration and Economics. Additional options in Information Systems and Social Science are available.
- the Specialisation Section (30 CPs): specialisation modules can be chosen from a wide range of options within the areas of Business Administration, Economics and Social Sciences. The bachelor seminar also takes place in this part of the programme.
- "Studium Integrale" (12 CPs): the university-wide component in all bachelor's programmes (except teacher training) which allows students to take modules outside the curriculum of their programme.
- the bachelor's thesis (12 CPs).

1.4 Study Abroad Option

The WiSo-faculty offers students the chance to study abroad and boasts an excellent, worldwide network of partner universities. Studying abroad offers students the opportunity to expand their horizons, develop intercultural skills and enrich their academic career.

Options Overview:

1. Study Abroad Programme (STAP):
 - Students can take part in a single semester exchange at a well-known partner institution. ERASMUS funding is available for the STAP programme.
 - Advantages: direct contact to partner institutions, organisational support from the faculty, exemption of tuition fees at partner institutions.
2. WiSo@: Academic Short Programmes for WiSo Students:
 - Annually, there is an opportunity to participate in academic short programs abroad, thereby acquiring additional credits during the semester holidays.
3. University-wide Cooperations:
 - The [International Office \(D9\)](#) of the University of Cologne has further partnerships and networks which can offer further options in addition to the faculty's partnerships.
4. Freemovers:
 - It is possible to organise your own exchange abroad outside of the programmes above.

Further Information is available on the faculty's [website](#). Questions regarding studying abroad can be directed to the [WiSo Student Service Point \(WiSSPo\)](#).

STAP Details:

Students should start planning their exchange early on in their studies. Usually, students go abroad in their fourth or fifth semester.

- The **main selection round** takes place once a year.
 - Application deadline: **15th of January** of the corresponding academic year.
 - Possible timeframe for exchange: winter semester (fall term) or summer semester (spring term) of the following academic year.
- **Secondary Selection Round:** If spaces are still available after the main selection round, a smaller selection round will take place in May.

Further information surrounding the application process is provided on the faculty's [website](#).

Credit Transfer Options:

The WiSo-faculty encourages students to gain international experience, Credits studied abroad can be easily integrated into study programmes at the faculty with the following options:

- **Studies Abroad Modules:**
 - The programme offers integrated studies abroad modules so that students can easily transfer their credits from partner institutions.
- **Studium Integrale**
 - In addition, within the Bachelor's programme, credits for academic achievements from abroad can be recognized through the Studium Integrale.
- **Single Course Credit Transfer:**
 - To offer more flexibility, it is also possible to apply for single course credit transfers for eligible courses.

Further details about the regulations for credit transfers are available on the website of the [WiSo Credit Transfer Centre](#) under Information > Studies Abroad.

Questions regarding credit transfer options can be directed to the [WiSo Student Service Point \(WiSSPo\)](#).

1.5 Example Study Plans

Example study plans are shown below depicting the aim of completing the programme in six semesters.

Individual aims and circumstances of students can widely influence study planning. Whether internships, special interest courses or personal reasons come up, it is possible to take modules at a different time. Extending studies by one or two semesters does not heavily impact studies from the faculty's perspective. **However, it is important to check whether any time-based restrictions or implications exist surrounding financing (e.g. BAföG).**

Modules that are offered every semester can be taken in either semester. Please be aware that individualised study plans can lead to possible timetable clashes. Further guidance for students is available at the [WiSo Student Service Point](#).

MODULE CATALOGUE – BUSINESS ADMINISTRATION - BACHELOR OF SCIENCE

valid for students of the ER 2021 (enrolment from winter semester 2021/22)

B.Sc. Business Administration (Start Winter Term)						
Semester 1	CM Mathematics	CM Statistics	CM Civil Property and Economic Law	CM Fundamentals of Information Systems	CM Accounting I	30

1.6 Midterm Rules

Some modules are offered in a midterm format to reduce the exam load at the end of a semester. Midterm courses are either offered in the first or second half of the semester with the number of classes being doubled in this time. The semesters are divided as follows:

- **Winter semester:** the first midterm ends around the beginning of December.
- **Summer semester:** the first midterm ends around the middle or end of May.

Exams for midterm modules in the first term of a semester will take place in the middle of the semester.

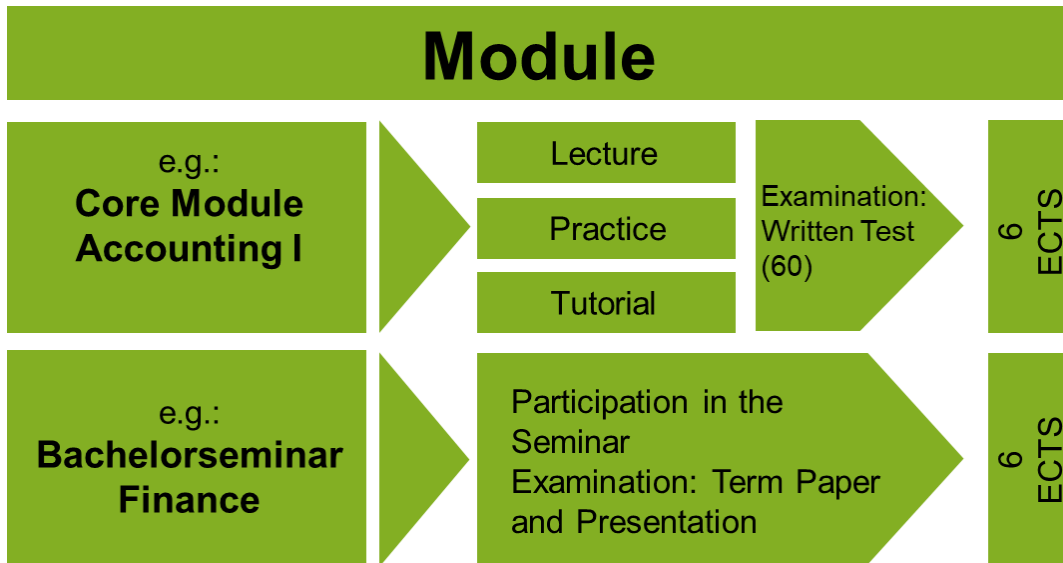

Binding information is available in KLIPS 2.0: the exact dates of specific courses and exams can be found in the [campus management system \(KLIPS 2.0\)](#).

1.7 Modularity

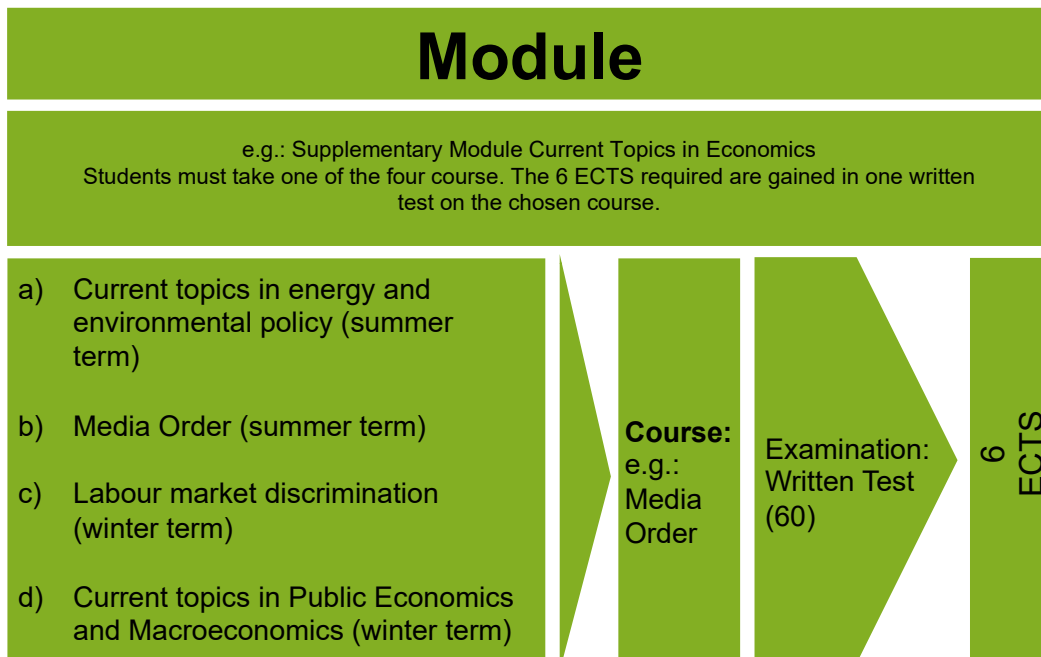

Each section of the bachelor's programme is divided into modules, the contents of which are described in the module descriptions. These descriptions are found at the end of this bachelor's module catalogue. Students who pass the necessary examinations are awarded credit points as proof of their successful participation in a module. The module examinations are taken at regular intervals during the programme. Each module consists of various parts and can usually be completed in one or two terms (see the "duration" section in the module description). A module can consist of lectures, exercises and/or tutorials on the same subject. There are also modules that utilise one teaching format, e.g. a seminar. In some cases, modules offer students a choice between various courses, and they are required to take one or more of them. In these cases, the examination can consist of two components (e.g. a written test in course one and a term paper in course two) or take the form of one, combined examination (a written test covering the content of courses one and two).

When planning your studies, please remember that not every module is offered every term. To find out whether a module is being offered, please refer to the "module availability" section of the module description.

The following examples are provided for purely illustrative purposes of individual scenarios; they do not necessarily include modules of the present study programme.

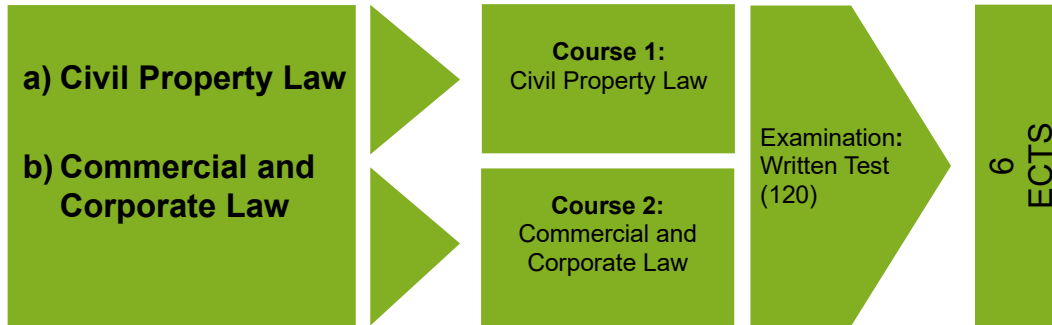

Scenario 1: The module can consist of one teaching and learning method or several complementary teaching and learning methods on the same topic.

Scenario 2: One course must be chosen from a selection of courses and the exam must be passed.

Module

e.g.: Core Module Civil Property and Economic Law
Students must attend both courses. The 6 ECTS required are gained in a written test (120), covering the content of both courses.

Scenario 3: Several courses are combined and at the end a test on the contents of all courses is completed successfully and the ECTS are thus acquired.

2 Study Advice

2.1 Guidance for Students

The [WiSo Student Service Point \(WiSSPo\)](#) is a one-stop shop for students with questions or problems during their studies and can provide guidance on a range of topics including: studying abroad, wellbeing and careers guidance. Students can visit WissPo in person or can contact the team by phone or email. Opening times for the services are displayed on the website.

2.2 Organising Studies

[KLIPS 2.0](#) is the central campus management system of the University of Cologne and the most important organisational tool for students during their studies.

Main Functions:

- **Online course catalogue:** students can view information and schedules for all courses and exams offered.
- **Course registration and de-registration:** students can register for their courses and exams. Please take note of the individual registration deadlines for each course or exam and that exam registration is **separate** to the course registration.
- **Study progress:** students can see an overview of their programme, completed modules and grades.
- **Personalised timetable:** students can put together their individual study plan for the semester.
- **Generate student documents:** students can generate their transcript of records and other study-relevant documents.

Important deadlines for KLIPS2.0 are on the website of [WiSo-KLIPS-Support](#). The website also includes video tutorials and FAQs to help students use KLIPS2.0.

Questions surrounding KLIPS2.0 for organisation of studies should be directed to the WiSo Student Service Point using their [contact form](#). Technical questions regarding KLIPS2.0 accounts should be directed to the [central KLIPS-Support](#) team.

2.3 Examinations

Many exams are offered twice per semester to allow students to spread the load of exams. Generally, second exam dates are provided as an alternative date and not conceptually planned as resits. Some exceptions may exist if the registration deadline for the second exam date is after the results of the first exam date are released. These exceptions will be communicated in the relevant courses.

Students have the right to view their corrected exam papers in exam review sessions.

Further information about these sessions is available on the [faculty's website](#).

Failed Examinations

It is not possible to retake exams that have been graded with a passing mark. Failed exams can be resit according to a general three-attempts rule: generally, each module can be attempted three times. Modules offered from other faculty's may have different rules which are specified in the examination regulations.

If a module is failed three times, it is strongly recommended that students attend a guidance session at the [WiSo Student Service Point \(WiSSPo\)](#) to discuss important steps regarding additional exam resits. If the requirements for additional resits are met, up to four extra attempts may be granted throughout studies.

- **Additional resits:** generally, three additional resits may be granted throughout studies. These resits cannot be granted if the failing grade was due to exam misconduct.
- **Extra resit:** students that have already attained 140 ECTS in their studies may be granted a fourth additional resit.

Failing out of the Study Programme

A programme is deemed failed if students fail an exam after using all available resits, including the additional resits available to them.

Resits for Modules with Multiple Exam Elements:

If a module consists of multiple exam elements, all elements must be graded with at least a passing grade (4,0) to pass the module. All elements that are failed must be retaken.

Resitting the Bachelor's Thesis:

If students do not pass their bachelor's thesis, it is possible to resit the thesis **once with a new topic**. Students can only register for a second attempt **after** official notification of failing the first attempt.

Calculation of Grades

A student's overall grade for the programme is calculated using the rules specified in the [examination regulations](#).

Module Grade: if a module consists of multiple elements, the module grade is calculated as specified in the [examination regulations](#).

Programme Section Grades: the grades for the core, supplementary and specialisation sections of the programme are calculated using a weighted average of the module grades within that section. The exact weighting for each module is specified in the [examination regulations](#).

Overall Grade: the overall grade is calculated through a weighted average of the programme section grades and the bachelor's thesis. The programme sections are weighted as follows:

- a) Mark for Core and Advanced Section: 108 of 168 CPs
- b) Mark for Supplementary Section: 18 of 168 CPs
- c) Mark for Specialisation Section: 30 of 168 CPs
- d) Mark for Bachelor's Thesis: 12 of 168 CPs.

2.4 Academic Practice

The University of Cologne offers various courses to support students with the process of academic practice for term papers and theses. The courses include:

- a) Literature research: the [WiSo Teaching Library](#) offers various courses for researching literature and databases.
- b) Writing skills: the [Kompetenzzentrum Schreiben](#), the [Professional Center](#), the [Kölner Studierendenwerk](#) and the [programme SchreibArt](#) offer advice as well as courses related to the issues that arise when writing an academic paper.

Students can register for the courses of the Professional Center and the SchreibArt programme within **Studium Integrale** under „Kompetenzen für das Studium“ (competencies for studies) in KLIPS 2.0. In addition, the WiSo faculty offers the courses “Techniken wissenschaftlichen Arbeiten für BWL-Studierende” (in German) and “Wissenschaftliche Arbeitstechniken für Wirtschafts- und Sozialwissenschaft” (in German) within Studium Integrale. It is possible to receive ECTS credits for these courses.

3 Module Tables and Descriptions

3.1 Core and Advanced Section

Im Basis- und Aufbaubereich gemäß § 28 Absatz 1 Nr. 1 der geltenden Prüfungsordnung müssen die zu Prüfenden 108 LP erwerben.

Group	Module	CP	CC/EC	Reqd. CP
Business Administration	CM Accounting I	6	CC	90
	CM Accounting II	6	CC	
	CM Corporate Development I	6	CC

Seminar	Bachelor Seminar Accounting and Taxation	6	EC	6
	Bachelor Seminar Corporate Development	6	EC	
	Bachelor Seminar Finance	6	EC	
	Bachelor Seminar Marketing	6	EC	
	Bachelor Seminar Supply Chain Management	6	EC	
	Bachelor Seminar Interdisciplinary Business Administration	6	EC	

3.4 Studium Integrale

All of the Faculty's bachelor programmes include an interdisciplinary component, known as the Studium Integrale, in which students accumulate 12 credit points. The Studium Integrale is a university-wide and interdisciplinary component of the courses of study in which academic and professional competences are imparted. The Studium Integrale has both theoretical and practical content, enabling students to focus on more academic aspects or topics related to their future careers enhancing their employability. It aims to teach and develop skills that go beyond subject-specific knowledge or that are related to basic academic and personal traits: scientific curiosity, systematic and analytical thinking, and ability to deal with complexity, a solution-minded outlook plus other abilities such as teamwork and foreign language skills.

The Studium Integrale courses are run jointly by the faculties and the University's Professional Centre. They enable students to pursue their own interests in more depth, gain an insight into other subjects and departments, attend courses dealing with issues of relevance to society, acquire skills relevant to their future careers and attend language classes. The "Universitas" segment offers formats especially designed for the Studium Integrale, such as lecture series on societal issues with related workshops. In addition, the Studium Integrale offers students assistance with their learning and studying, helping them with such questions as how to write an academic paper or how to conduct literature reviews. Periods of training abroad and work experience can also be credited in the Studium Integrale. The Studium Integrale carries 12 credit points in total and formally counts as a module. There is no restriction on the number of attempts possible for Studium Integrale examinations.

Any credit points attained in the Studium Integrale over and above the 12 credit points specified in the study structure are shown on the transcript of records.

3.5 Bachelor's Thesis

Module	CP	CC/EC	Reqd. CP
Bachelor's Thesis General Business Administration	12	EC	12
Bachelor's Thesis Accounting and Taxation	12	EC	
Bachelor's Thesis Corporate Development	12	EC	
Bachelor's Thesis Finance	12	EC	
Bachelor's Thesis Marketing	12	EC	
Bachelor's Thesis Supply Chain Management	12	EC	
Bachelor's Thesis Interdisciplinary Business Administration	12	EC	

The bachelor's thesis carries 12 CPs and is written at the end of the programme. Its aim is to illustrate that the candidate is capable of working and reflecting independently on a specific problem related to the subject matter covered on the programme, using the necessary methods and within a specified period. On the Business Administration programme, the topic of the bachelor's thesis must be taken from one of the areas, Accounting and Taxation, Corporate Development, Finance, Marketing and Supply Chain Management, from Interdisciplinary Business Administration or General Business Administration. Students who have successfully completed the corresponding Bachelor's seminar in a previous semester will be considered for the allocation of the Bachelor's thesis. The Bachelor's thesis will then be written in the same area in which the Bachelor's seminar was taken.

Group bachelor's theses can also be permitted if a clear distinction between and assessment of each candidate's contribution is possible. Objective criteria that make a clear distinction possible, such as sections, page numbers or topics, are used to indicate which student made which contribution. The total workload required of each group member must exceed the requirements for individual bachelor's theses to an appropriate extent. The difficulty and content of a group thesis must meet the same requirements as for theses undertaken individually and independently. The contribution made by each individual must meet the requirements for bachelor's theses.

To be allowed to register for the bachelor's thesis component, candidates must have acquired at least 100 credit points; additionally, the Bachelor's Seminar must be successfully completed. In line with the number of credit points it carries, the workload allotted for the thesis is 360 hours, i.e. 12 weeks. Bachelor's theses should not be more than 40 pages long. Further and more detailed information concerning bachelor's theses can be found in the examination regulations.

3.6 Module Descriptions

3.6.1 Preparatory Module

Preparation Module Mathematics					
Module code	Workload 180	ECTS credits none, school's additional offer	Module language German	Module availability every term	Duration 1 term
1	Courses Preparation Course for Mathematics		Contact hours 60 h	Self-Studies 120 h	Course Language German
2	Module Content <ul style="list-style-type: none"> • formal/technical calculating/arithmetic • vector and matrix algebra • functions, sequences and marginal values • differential calculus for functions of one variable • integral calculus for functions of one variable 				
3	Learning Objectives Students... ... know and understand the relevant methods and theories for the points mentioned above under „Module content“. ...repeat and apply the essential learning content of mathematics, which they have learned in school and is essential for the Bachelor programme. ...complement their school's knowledge relating to topics that were not part of exams or the schedule and apply that knowledge.				
4	Teaching and learning methods lecture with integrated exercise				
5	Module entry requirements No recommendations				
6	Mode of end-of-module examination none				
7	Prerequisites for awarding of credit points no awarding of ECTS credits, school's additional offer				
8	Other programmes that use the module Bachelor of Science Business Administration Bachelor of Science Economics				
9	Module Manager Dr. Christoph Scheicher				

10	Miscellaneous <ul style="list-style-type: none">• The participation in the preparation course is optional and is recommended to students who chose basic course in Mathematics in school or did not gain good results in the advanced course.• The preparation course normally takes place as block course in the month before the lecture starts• An application is not required.
-----------	---

3.6.2 Core and Advanced Section Business Administration

CM Accounting I					
Module Code 1016BBMAT1	Workload 180h	ECTS Credits 6	Module Language German	Module Availability every term	Duration 1 Term
1	Courses Accounting I		Contact Hours 90h	Self-Studies 90h	Course Language German
2	Module Content <ul style="list-style-type: none"> • Introduction to Accounting • Fundamentals in Financial Accounting • Fundamentals in Managerial Accounting • Book Keeping • Case Studies 				
3	Learning Objectives Students... ... know and understand basic theories. ... apply theories in pre-structured contexts (e.g. case studies) in a solution-oriented way. ... know and understand common methods. ... use methods in pre-structured contexts in a solution-oriented way. ... analyse (current) questions and challenges within the framework of pre-structured contexts. ... know and understand the relevant methods and theories for the points mentioned above under "Module content".				
4	Teaching and Learning Methods lecture practice tutorial				
5	Module Entry Requirements none				
6	Mode of End-Of-Module Examination Written test: WT (60)				
7	Prerequisites for Awarding of Credit Points Passing the module examination				
8	Other Programmes that Use the Module Bachelor of Science Betriebswirtschaftslehre: Core and Advanced Section Business Administration Bachelor of Science Wirtschaftsinformatik: Supplementary Section Information Systems Bachelor of Arts Medienwissenschaft: Media and Technology Management Bachelor of Arts Regionalstudien China - Betriebswirtschaftslehre: Ergänzungsbereich BWL Bachelor of Arts Lehramt: Bachelor Education WiSo Bachelor of Science Wirtschaftsinformatik (ab WS24/25): Supplementary Section Information Systems Bachelor of Science Gesundheitsökonomie: Supplementary Section Health Economics				

MODULE CATALOGUE – BUSINESS ADMINISTRATION - BACHELOR OF SCIENCE

valid for students of the ER 2021 (enrolment from winter semester 2021/22)

	Bachelor of Science Volkswirtschaftslehre: Specialisation Section Track Economics Specialisation Section Track Business Administration Specialisation Section Track Social Sciences Bachelor of Science Sozialwissenschaften: Supplementary Section Social Sciences
9	Module Manager Area Accounting and Taxation
10	Miscellaneous Courses take place in first part of the semester (1. midterm).

CM Accounting II						
Module Code 1016BBMAT2		Workload 180h	ECTS Credits 6	Module Language German	Module Availability every term	Duration 1 Term
1	Courses Accounting II			Contact Hours 60h	Self-Studies 120h	Course Language German
2	Module Content Profound analysis of advanced topics in <ul style="list-style-type: none"> • Financial Accounting • Managerial Accounting on the basis of case studies and using IT-Tools (in relatively small groups).					
3	Learning Objectives Students... <ul style="list-style-type: none"> ... apply theories in pre-structured contexts (e.g. case studies) in a solution-oriented way. ... know and understand common methods. ... use methods in pre-structured contexts in a solution-oriented way. ... analyse (current) questions and challenges within the framework of pre-structured contexts. ... communicate continuously and purposefully within teaching and learning groups. ... present and/or discuss results with teaching staff and other students. ... reflect their own performance and implement feedback constructively. ... know and understand the relevant methods and theories for the points mentioned above under "Module content". 					
4	Teaching and Learning Methods lecture practice					
5	Module Entry Requirements Recommendation: CM Accounting I					
6	Mode of End-Of-Module Examination Written test: WT (60)					
7	Prerequisites for Awarding of Credit Points Passing the module examination					
8	Other Programmes that Use the Module Bachelor of Science Betriebswirtschaftslehre: Core and Advanced Section Business Administration					
9	Module Manager Area Accounting and Taxation					
10	Miscellaneous Courses take place in second part of the semester (2. midterm).					

CM Corporate Development I						
Module Code 1253BBMCD1		Workload 180h	ECTS Credits 6	Module Language German	Module Availability every term	Duration 1 Term
1	Courses Corporate Development I (2. Midterm)			Contact Hours 45h	Self-Studies 135h	Course Language German
2	Module Content This course first introduces foundations of Corporate Governance and Corporate Strategy. Building on this, concepts of Organizational Design and Instruments of Human Resource Management are presented and analysed.					
3	Learning Objectives Students... ... know and understand basic theories in the area of corporate governance, business strategy, organizational design and HR-management. ... apply theories in pre-structured contexts (e.g. case studies) in a solution-oriented way. ... know and understand common methods. ... analyse (current) questions and challenges within the framework of pre-structured contexts. ... establish and evaluate independently developed positions. ... develop an understanding of the impact of decisions that take into account environmental, economic, social and/or ethical criteria. ... know and understand the relevant methods and theories for the points mentioned above under "Module content".					
4	Teaching and Learning Methods lecture tutorial					
5	Module Entry Requirements none					
6	Mode of End-Of-Module Examination Written test: WT (60)					
7	Prerequisites for Awarding of Credit Points Passing the module examination					
8	Other Programmes that Use the Module Bachelor of Science Betriebswirtschaftslehre: Core and Advanced Section Business Administration Bachelor of Science Wirtschaftsinformatik: Supplementary Section Information Systems Bachelor of Arts Medienwissenschaft: Media and Technology Management Bachelor of Arts Regionalstudien China - Betriebswirtschaftslehre: Ergänzungsbereich BWL Bachelor of Arts Lehramt: Bachelor Education WiSo Bachelor of Science Wirtschaftsinformatik (ab WS24/25): Supplementary Section Information Systems Bachelor of Science Gesundheitsökonomie: Supplementary Section Health Economics Bachelor of Science Volkswirtschaftslehre: Specialisation Section Track Business Administration

CM Microeconomics (Business Administration)						
Module Code 1289BBMMB1		Workload 270h	ECTS Credits 9	Module Language German	Module Availability every term	Duration 1 Term
1	Courses Microeconomics (9 CP)			Contact Hours 105h	Self-Studies 165h	Course Language German
2	Module Content Fundamental questions and methodology of microeconomics: the allocation of scarce resources to markets (competitive and monopoly markets) and the economic behaviour of individual economic actors, in particular households and companies (supply and demand).					
3	Learning Objectives Students... ... use methods in the area of microeconomics in pre-structured contexts in a solution-oriented way. ... know and understand basic theories in the area of microeconomics. ... communicate continuously and purposefully within teaching and learning groups. ... reflect their own performance during their electronic homework and implement feedback constructively. ... know and understand the relevant methods and theories for the points mentioned above under "Module content".					
4	Teaching and Learning Methods lecture practice tutorial					
5	Module Entry Requirements none					
6	Mode of End-Of-Module Examination Written test: WT (90)					
7	Prerequisites for Awarding of Credit Points Passing the module examination					
8	Other Programmes that Use the Module Bachelor of Science Betriebswirtschaftslehre: Core and Advanced Section Business Administration					
9	Module Manager Dr.' Julia Fath					
10	Miscellaneous The lecture is designed as an inverted classroom. The contents of the e-lecture and the e-homework are to be prepared before attending the lecture and are assumed to be known. The electronic homework in ILIAS is an essential part of the workload. Bonus points for the final exam can be achieved by sending in bonus tasks.					

CM Macroeconomics (Business Administration)						
Module Code 1302BBMMB1		Workload 270h	ECTS Credits 9	Module Language German	Module Availability every term	Duration 1 Term
1	Courses Macroeconomics (9 CP)			Contact Hours 105h	Self-Studies 165h	Course Language German
2	Module Content <ul style="list-style-type: none"> • Measurement and interpretation of macroeconomic aggregates • Determinants and importance of interaction between markets and prices for general equilibrium allocations • Causes of inflation, financial crises, unemployment, and business cycles and their relation to frictions in goods, credit, and labour markets • Effects of fiscal and monetary policy and other economic policy measures in the short and medium run • Empirical facts and theoretical approaches for explaining long-term economic developments and structural change • Long-run trends and recent developments in macroeconomic aggregates like income, savings, and investment. A particular focus will be on the role of the accumulation of human and physical capital, technological progress as well fundamental determinants of growth 					
3	Learning Objectives Students... ... use methods in the area of macroeconomics in pre-structured contexts in a solution-oriented way. ... know and understand basic theories in the area of macroeconomics. ... discuss results with teaching staff and other students. ... develop an understanding of the impact of decisions that take into account environmental, economic, social or ethical criteria. ... know and understand the relevant methods and theories for the points mentioned above under "Module content"					
4	Teaching and Learning Methods lecture practice tutorial					
5	Module Entry Requirements none					
6	Mode of End-Of-Module Examination Written test: WT (90)					
7	Prerequisites for Awarding of Credit Points Passing the module examination					
8	Other Programmes that Use the Module Bachelor of Science Betriebswirtschaftslehre: Core and Advanced Section Business Administration					
9	Module Manager CMR Center for Macroeconomic Research					
10	Miscellaneous					

CM Mathematics						
Module Code 1314BBMMA1		Workload 180h	ECTS Credits 6	Module Language German	Module Availability every term	Duration 1 Term
1	Courses Mathematical Methods			Contact Hours 105h	Self-Studies 75h	Course Language German
2	Module Content <ul style="list-style-type: none"> • Repetition of relevant school knowledge • Combinatorics • Basic concepts of linear algebra • Basics of financial mathematics • Functions of several variables • Differential calculus for functions of several variables and their economic applications • Optimization with and without constraints for functions of several variables • Integral calculus for functions of one and several variables as well as their application in statistics 					
3	Learning Objectives Students... ... use methods in mathematics for business and economics in pre-structured contexts in a solution-oriented way. ... communicate continuously and purposefully within teaching and learning groups. ... design their learning and working processes independently. ... reflect their own performance during their electronic homework and implement feedback constructively. ... know and understand the relevant methods and theories for the points mentioned above under "Module content".					
4	Teaching and Learning Methods lecture practice tutorial					
5	Module Entry Requirements none					
6	Mode of End-Of-Module Examination Written test: WT (90)					
7	Prerequisites for Awarding of Credit Points Passing the module examination					
8	Other Programmes that Use the Module Bachelor of Arts Regionalstudien Ost- und Mitteleuropa - Volkswirtschaftslehre: Ergänzungsbereich VWL Bachelor of Arts Regionalstudien Lateinamerika - Volkswirtschaft: Ergänzungsbereich VWL Bachelor of Science Betriebswirtschaftslehre: Core and Advanced Section Business Administration Bachelor of Science Wirtschaftsinformatik: Core Section Information Systems Bachelor of Arts Regionalstudien China - Betriebswirtschaftslehre: Ergänzungsbereich BWL Bachelor of Arts Regionalstudien China - Volkswirtschaftslehre: Ergänzungsbereich VWL					

MODULE CATALOGUE – BUSINESS ADMINISTRATION - BACHELOR OF SCIENCE

valid for students of the ER 2021 (enrolment from winter semester 2021/22)

	<p>Bachelor of Science Management, Economics and Social Sciences: Specialisation Section Management, Economics and Social Sciences</p> <p>Bachelor of Science Volkswirtschaftslehre: Core and Advanced Section Economics</p>
9	<p>Module Manager Dr. Christoph Scheicher</p>
10	<p>Miscellaneous After lectures, electronic homework should be completed. Bonus points towards the final exam can be achieved through completing e-homework. The contents of the lecture are to be reviewed before exercise classes (if necessary, with the help of the linked video tutorials). The e-homework has to be completed individually before exercise classes and the material is assumed to be known for these classes. Interactive exercise classes take place in larger groups, interactive tutorials in smaller groups. Required reading (in German): Mosler, Dyckerhoff, Scheicher (current edition): Mathematische Methoden für Ökonomen. Video tutorials (in German): https://www.youtube.com/MathematischeMethoden</p>

CM Civil Property and Economic Law					
Module Code	Workload	ECTS Credits	Module Language	Module Availability	Duration
1015BBMBR1	180h	6	German	every term	1 Term
1	Courses a) Civil Property Law b) Commercial and Corporate Law		Contact Hours a) 30h b) 30h	Self-Studies a) 60h b) 60h	Course Language a) German b) German
2	<p>Module Content</p> <p>Examples will be taken from the basic principles of civil property law, i.e. civil law rules dealing with cash and non-cash claims arising from private law agreements. An additional aim is to teach students the most important rules concerning commercial transactions.</p> <p>Civil Property Law:</p> <ol style="list-style-type: none"> 1. Fundamentals 2. Contract conclusion, particularly mutual consent, interpretation, receipt (of a declaration of intent), form, legal capacity, representation, terms and conditions 3. Termination of contracts, particularly performance, contestation, withdrawal, revocation, impossibility 4. Damages due to breach of contract/in tort 5. Commercial warranties for defects 6. Limitation periods <p>Commercial and Corporate Law:</p> <ol style="list-style-type: none"> 1. The German concepts of “Kaufmann” and “Firma” and commercial representation 2. Commercial register/company register 3. Commercial transactions 4. Partnerships 5. Corporations 6. Groups 7. International transactions 				
3	<p>Learning Objectives</p> <p>Students...</p> <ul style="list-style-type: none"> ... know and understand representation and liability issues in corporation law. ... know the basics concerning the conclusion, performance and termination of contracts. ... solve independently simple cases related to real-life practice in private economic transactions. ... recognise the most important forms of enterprise in partnership and corporation law. ... identify the most important commercial rules that differ from the German Civil Code (“BGB”). ... learn how legal experts think and present arguments; this enables students to conduct effective talks in all legal matters. ... know and understand the relevant methods and theories for the points mentioned above under “Contents of the Module content” above. 				
4	<p>Teaching and Learning Methods</p> <p>lecture</p>				
5	<p>Module Entry Requirements</p> <p>none</p>				
6	<p>Mode of End-Of-Module Examination</p> <p>Written test: WT (60)</p>				

7	<p>Prerequisites for Awarding of Credit Points A pass in the written test. Students must take both courses. The written test will be based on the content of both courses.</p>
8	<p>Other Programmes that Use the Module Bachelor of Science Betriebswirtschaftslehre: Core and Advanced Section Business Administration Bachelor of Arts Lehramt: Bachelor Education WiSo</p>
9	<p>Module Manager Dr. Christian Deckenbrock</p>
10	<p>Miscellaneous Recommended reading: Deckenbrock/Höpfner, Bürgerliches Vermögensrecht: Grundlagen des Wirtschaftsprivatrechts mit Fällen und Lösungen, 5th ed. 2022. Prütting/Weller: Handels- und Gesellschaftsrecht, 10th ed. 2020</p>

CM Statistics						
Module Code 1314BBMST1		Workload 180h	ECTS Credits 6	Module Language German	Module Availability every term	Duration 1 Term
1	Courses Descriptive Statistics and Probability Theory			Contact Hours 120h	Self-Studies 60h	Course Language German
2	Module Content <ul style="list-style-type: none"> • Fundamental methods of descriptive statistics • Fundamentals of probability theory 					
3	Learning Objectives Students... ... know and understand common methods in the areas of statistics and probability. ... discuss results with teaching staff and other students. ... design their learning and working processes independently. ... know and understand the relevant methods and theories for the points mentioned above under "Module content".					
4	Teaching and Learning Methods lecture practice tutorial					
5	Module Entry Requirements none

9	Module Manager Prof. Dr. Rainer Dyckerhoff Dr. Bastian Gribisch
10	Miscellaneous In the self-study phase, tutorials are offered.

CM Corporate Development II					
Module Code 1253BBMCD2	Workload 180h	ECTS Credits 6	Module Language German	Module Availability every term	Duration 1 Term
1	Courses Strategic Business Toolkit: Entwickle Dein Gründungskonzept		Contact Hours 15h	Self-Studies 165h	Course Language German
2	Module Content The module includes conceptual and applied elements such as student presentations, discussions, and intensive project work in the form of, for example, the development of a start-up concept, a business simulation or case study. Students use skills and knowledge they have acquired during their studies and within this module (also through self-study phases based on e-learning) to develop solutions for problems from the business world.				
3	Learning Objectives Students... ... use practical methods of strategic management and entrepreneurship to develop concepts. ... establish and evaluate independently developed positions. ... design their learning and working processes independently. ... know and understand the relevant methods and theories for the points mentioned above under "Module content".				
4	Teaching and Learning Methods seminar				
5	Module Entry Requirements Recommendation: CM Corporate Development I				
6	Mode of End-Of-Module Examination Combined examination: Project work				
7	Prerequisites for Awarding of Credit Points Passing the module examination				
8	Other Programmes that Use the Module Bachelor of Science Betriebswirtschaftslehre: Core and Advanced Section Business Administration				
9	Module Manager Univ.-Prof. Dr. Anne Burmeister Univ.-Prof. Dr. Matthias Heinz Univ.-Prof. Dr. Bernd Irlenbusch Univ.-Prof. Dr. Dirk Sliwka				
10	Miscellaneous The E-Learning phase takes place during the first half of the semester. This part of the course is asynchronous so that students can study the E-Learning content flexibly. Workshops 1 and 2 take place during the second half of the semester.				

MODULE CATALOGUE – BUSINESS ADMINISTRATION - BACHELOR OF SCIENCE

valid for students of the ER 2021 (enrolment from winter semester 2021/22)

CM Finance II					
Module Code	Workload	ECTS Credits	Module Language	Module Availability	Duration
1259BBMF12	180h	6	German and English	every term	1 Term
1	Courses Cases in Finance (2nd term)		Contact Hours 15h	Self-Studies 165h	Course Language German
2	Module Content The module includes conceptual and applied elements to value stocks (e.g., calculating financial fundamentals, estimate risk, determine cost of capital) including intensive student project work, presentations and discussions. Teams of students develop solutions for corresponding issues by querying selected company databases and conducting statistical analyses of this data. Students use skills and knowledge they have acquired from the core modules Statistics, Finance I and Accounting I. An additional compact lecture provides additional, specifically required knowledge and techniques. In addition to attending working sessions, students are required to do their own reading and to get familiar with the required statistical software independently. Due to organisational and pedagogical reasons classes need to be restricted to small groups.				
3	Learning Objectives Students... ... analyse (current) questions and challenges within the framework of pre-structured contexts. ... establish and evaluate independently developed positions. ... design their learning and working processes independently. ... know and understand the relevant methods and theories for the points mentioned above under "Module content".				
4	Teaching and Learning Methods project				
5	Module Entry Requirements Recommendation: Core Modules Statistics, Finance I and Accounting I				
6	Mode of End-Of-Module Examination Combined examination: Project work				
7	Prerequisites for Awarding of Credit Points Passing the module examination				
8	Other Programmes that Use the Module Bachelor of Science Betriebswirtschaftslehre: Core and Advanced Section Business Administration				
9	Module Manager Univ.-Prof. Dr. Dieter Hess Univ.-Prof. Dr. Alexander Kempf Univ.-Prof. Dr. Heinrich R. Schradin				
10	Miscellaneous				

CM Marketing II						
Module Code 1266BBMMA2		Workload 180h	ECTS Credits 6	Module Language German	Module Availability every term	Duration 1 Term
1	Courses a) Angewandtes Dienstleistungsmarketing am Beispiel der Messe- und Eventbranche b) Marketing Applications			Contact Hours a) 15h b) 15h	Self-Studies a) 165h b) 165h	Course Language a) German b) German
2	Module Content The module includes conceptual and applied elements such as student presentations, discussions, and intensive project work in the form of, for example, a business simulation or case study. Students use skills and knowledge they have acquired during their studies to develop solutions for problems from the business world. They are required to do their own reading independently in addition to attending working sessions.					
3	Learning Objectives Students... ... analyse (current) questions and challenges within the framework of pre-structured contexts. ... establish and evaluate independently developed positions. ... design their learning and working processes independently. ... know and understand the relevant methods and theories for the points mentioned above under "Module content".					
4	Teaching and Learning Methods project					
5	Module Entry Requirements Recommendation: CM Mathematics, AM Statistics and Econometrics, CM Marketing I					
6	Mode of End-Of-Module Examination Combined examination: Project work					
7	Prerequisites for Awarding of Credit Points Passing the module examination of the course a) or b)					
8	Other Programmes that Use the Module Bachelor of Science Betriebswirtschaftslehre: Core and Advanced Section Business Administration					
9	Module Manager Univ.-Prof. Dr. Werner Reinartz Univ.-Prof. Dr. Franziska Völckner					
10	Miscellaneous					

CM Supply Chain Management II					
Module Code 1271BBMSC2	Workload 180h	ECTS Credits 6	Module Language German	Module Availability every term	Duration 1 Term
1	Courses Supply Chain Management Applications		Contact Hours 30h	Self-Studies 150h	Course Language German
2	Module Content The module includes conceptual and applied elements such as student presentations, discussions, and project work in the form of, for example, a business simulation or case study. Students use skills and knowledge they have acquired during their studies to develop solutions for problems from the business world. They are required to do their own reading independently in addition to attending working sessions.				
3	Learning Objectives Students... ... analyse (current) questions and challenges within the framework of pre-structured contexts. ... establish and evaluate independently developed positions. ... design their learning and working processes independently. ... know and understand the relevant methods and theories for the points mentioned above under "Module content".				
4	Teaching and Learning Methods project

AM Ecological Economics					
Module Code 1289BAMEE1	Workload 180h	ECTS Credits 6	Module Language English	Module Availability every 2nd term - winter term	Duration 1 Term
1	Courses Ecological Economics		Contact Hours 45h	Self-Studies 135h	Course Language English
2	Module Content This module covers selected issues in ecological economics, i.e. the economics relevant to "space ship Earth". Ecological economics recognises the finiteness of the planet regarding physical (material and energy) resources and limits to absorptive capacities within ecosystems. The module includes natural science foundations, especially the laws of thermodynamics and their relevance for economics. It covers the role of energy conversion in wealth creation, and the role of entropy production in environmental impacts. Implications regarding energy and environmental regulation are discussed.				
3	Learning Objectives Students... ... analyse (current) questions and challenges within the framework of pre-structured contexts. ... communicate continuously and purposefully within teaching and learning groups. ... communicate in English. ... develop an understanding of the impact of decisions that take into account environmental, economic, social and/or ethical criteria. ... know and understand the relevant methods and theories for the points mentioned above under "Module content".				
4	Teaching and Learning Methods lecture practice				
5	Module Entry Requirements Recommendation: CM Microeconomics and CM Macroeconomics or CM Fundamentals of Economics
