1 Business Administration

1.1 Content and objectives of the programme

Graduates of the Business Analytics & Econometrics program have competencies at the Master's level of the German Qualifications Framework, which corresponds to level 7 of the German Qualifications Framework. The competencies which are acquired during the course of studies are listed below as "Intended Learning Outcomes". These Intended Learning Outcomes are comprised of "Learning Goals" and "Learning Objectives". The former are superordinate goals for the graduates of this study programme, while the latter refer to concrete tasks performed by the students.

| Graduates act as/with... | |
|---|--|
| Subject-related and analytical competencies | ...experts for machine learning as well as for statistical methods to analyze and design business and economic challenges. |
| | <i>Students use machine learning and statistical methods as well as subject-specific concepts in all areas of business and economics.</i> |
| | <i>Students analyze management and economic theories, taking into account environmental, social, and ethical criteria in these areas.</i> |
| | ...innovative problem solvers:in order to develop effective strategies in the context of business analytics and econometrics. |
| | <i>Students apply appropriate methods and independently developed theory-based solution strategies to subject-specific problems.</i> |
| | <i>The students independently write solution approaches to business and economic issues on the basis of collected data or structured literature, e.g. in the context of a scientific paper in this field</i> |
| Communicative and cooperative competencies | ...communication strategies in business analysis and econometrics in order to support decision-making processes in a scientifically sound manner. |
| | <i>Students act cooperatively in international and heterogeneous teams.</i> |
| | <i>Students discuss scientific topics with people from theory and practice on the basis of independently developed positions and solutions.</i> |
| Personal competencies | ...leaders in a globalized world to meet future challenges. |
| | <i>Students evaluate the impact of business and economic decisions on the achievement of corporate or societal goals.</i> |
| | <i>Students lead teams responsibly and purposefully, taking into account environmental, social and ethical criteria.</i> |
| | ...independent and self-reflective decision-makers:in order to continuously develop their own competencies in practice. |
| | <i>The students design their learning, working and development processes independently.</i> |
| | <i>Students assume leadership roles in different contexts.</i> |

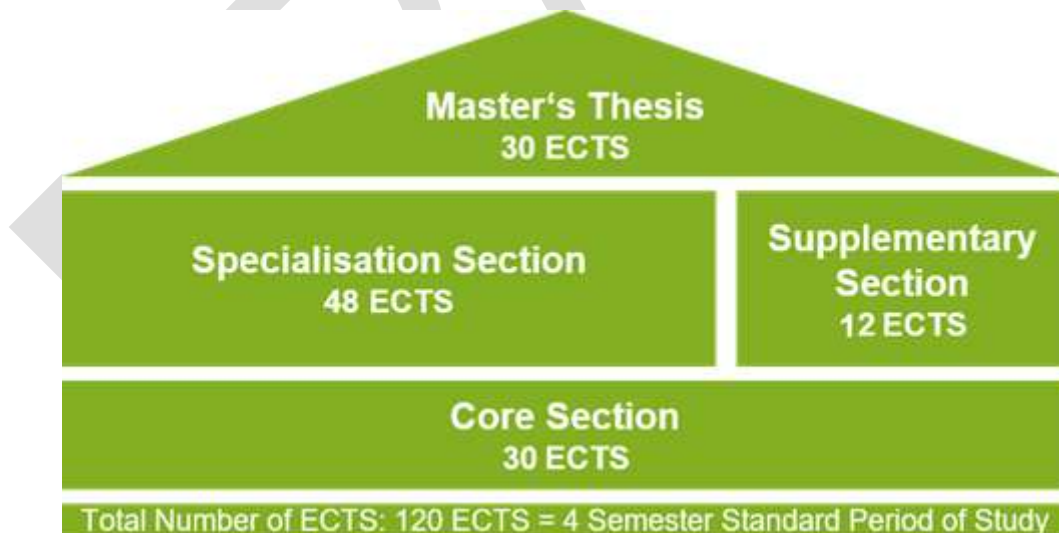

1.2 Requirements

The admission requirement for the study programme is the completion of professionally qualifying degree in a relevant bachelor's programme. The programme should have had a minimum duration of at least six semesters, in which at least 180 credit points were acquired, or an equivalent successfully completed course of study with a final grade of 2.7 or better. Furthermore, B2 English language skills are required at the beginning of the programme.

These and other subject-related requirements for the course of study are defined in the **admission regulations**.

1.3 Programme structure

The Master in Business Analytics & Econometrics is a 120 ECTS credits programme, with a standard study period of four terms and is made up of the following subject categories: The core section (30 ECTS credits) consists of basic method modules, chosen by the student. The specialisation section (48 ECTS credits) consists of modules for the respective major and a seminar. In the supplementary section (12 ECTS credits), students can choose from among a wide range of offerings in the fields of business administration, information systems and data analysis. The last section is the master's thesis, worth 30 ECTS Credits.

1.4 Study Abroad Option

The WiSo Faculty offers a broad range of study abroad options within an excellent network of prestigious partner universities worldwide. The so-called Study Abroad Programme (STAP) includes ERASMUS exchanges and provides an opportunity for a single-term stay at one of the WiSo Faculty's partner universities.

Successful STAP applicants benefit from direct contact and organisational support at the partner university and are exempt from paying tuition fees there. The range of universities available depends on the master programme in which the student is enrolled – the possible options are listed in the **WiSo EXchange (WEX) International Outgoings Portal** (access through the student's UoC account only), along with detailed information on each university.

Every year, in addition to the STAP programme, the WiSo Faculty organises an exclusive short-term study option WiSo@NYC which takes place in New York City.

In addition to these options offered by the Faculty, master students can also apply for a non-WiSo exchange, offered by Dezernat 9 – Internationales (Central International Office of the University of Cologne) within the 'fakultätsübergreifende Partnerschaften' framework. Further possibilities include going abroad as a freemover (i.e. as a student who organises his or her stay abroad independently) or participating in short courses or summer schools offered under separate terms and conditions.

The **International Relations Center** (ZIB WiSo) serves as point of information and advice for all study abroad options.

The Faculty's Study Abroad me (STAP):

Master students should plan and submit their application for a term abroad at the beginning of their master studies. The STAP main selection round takes place once a year with application deadline 15 January and allows for an application either for fall term or spring term of the following academic year. Detailed information on the selection criteria and the best preparation for a STAP application can be found online in the **[STAP Master Application Manual](#)**. As an exception, if a certain number of slots are still available for spring term, a secondary STAP selection round will be offered in May, with a limited choice of exchange opportunities.

STAP Master – main selection round (fall term and spring term)

* Alternative offer: if no offer can be given at one of the five preferred universities and if slots at other universities are available.
 ** Last of main selection round. In case any exchange slots become available after 15 March, these slots will be made available in a secondary selection round.

STAP Master – secondary selection round (for spring term only)

Please note: there is no guarantee that a secondary selection round will take place every year, nor should a wide range of exchange opportunities be expected.

* Deadline for handing in THESES results (if taken until 7 June) 15 June. ** Alternative offer: if no offer can be given at one of the five preferred universities and if slots at other universities are available.

Credit transfer options from studies abroad:

The WiSo Faculty has put a lot of emphasis on internationalisation in the design of its master courses, offering broad credit transfer options for all kinds of study abroad options. Each master course includes at least one "Studies Abroad" module, with a broad range of courses suitable for credit transfer. In addition, a single course-to-course credit transfer can be considered. For more information on credit transfer rules and regulations, please go to **WiSo Credit Transfer Center** > Information > Studies Abroad. For any questions regarding credit transfer, students can contact the **ZIB WiSo** or the **WiSo Credit Transfer Center**.

Sections **Core** Spcialisation Supplementary

When creating your individual study plan, pay attention to the respective module availability. This may result in deviations from the general recommendation.

1.6 Modules with mid-term examinations

Some modules have courses that only run for half a term, usually with twice the normal number of classes. For these modules, the term is divided into two roughly equal halves. In the fall, the mid-term usually ends at the beginning of December; in the spring, it is usually in the middle or at the end of May. Often, the examinations for these courses are held mid-term, enabling students to reduce their examination load at the end of term.

The information in the campus management system (KLIPS) regarding the dates of courses and examinations is relevant in this context.

1.7 Calculation of the overall mark

The marks for core, supplementary and specialisation categories are calculated as the weighted arithmetic mean of the marks for the respective modules, based on the weighting system described in the examination regulations. In the case of end-of-module examinations consisting of several components, the mark for the module is calculated as specified in the **examination regulations**.

The overall mark for the degree is calculated as the weighted arithmetic mean of the marks for the subject categories and the mark for the master's thesis. On the Business Administration me, the weighting for the contributions to the overall mark is as follows:

- a) Mark for core section: 30 of 120 ECTS credits
- b) Mark for specialisation section: 48 of 120 ECTS credits
- c) Mark for supplementary section: 12 of 120 ECTS credits
- d) Mark for master's thesis: 30 of 120 ECTS credits

1.8 Rules for failed attempts

Students may retake module examinations they have failed. The number of attempts is limited to three per module. Modules offered by faculties other than the Faculty of Management, Economics and Social Sciences ("WiSo Faculty") may be subject to different rules.

After failing an exam three times, the **WiSo Student Service Point (WiSSPo)** provides information regarding the possibility of and requirements for receiving additional resit attempts. If none of the first three examination attempts were failed due to cheating or to an offence, an additional two resit attempts can be granted at any point during the me. Students who have accumulated at least 90 credit points can be granted an extra additional attempt. If a student fails an examination in the two additional attempts and the extra attempt for students with 90 points or more, they are deemed to have failed the me at the final attempt. Where a module

examination consists of several components, the candidate must obtain a “bestanden” (pass) mark, or at least an “ausreichend (4,0)” (sufficient) mark, in all of the examination components.

All components marked “mangelhaft (5,0)” or “nicht bestanden” (fail) must be retaken.

It is not possible to resit module examinations that have already been passed.

A failed master’s thesis can be retaken once, with a new topic. Students can only register for a second attempt after the result of their first attempt being announced.

DRAFT

2 Support for students

2.1 First Point of Contact for Questions and Counselling

The **WiSo Student Service Point** (WissPo) is the first, central contact point for students who have questions and problems during their studies. WissPo is also the first point of contact for further counselling offers, e.g. studying abroad, wellbeing, careers guidance. Students can contact WissPo via phone, email or visit in person. Please take note of the opening times and contact details on the website.

2.2 Course registration in KLIPS 2.0

KLIPS 2.0 is the central campus management system of the University of Cologne. At the WiSo faculty, KLIPS 2.0 serves as a student organisation tool. Students should use it as an online course catalogue, for registration and deregistration of courses and examinations, as well as an overview of the complete study programme and calendar. Information on current dates and deadlines of the WiSo faculty, as well as video tutorials and FAQs about KLIPS can be found on the **WiSo-KLIPS-Support** website. If you have further questions, please contact WiSo-KLIPS-Support via this [contact form](#). For questions regarding your KLIPS account, please contact the central [KLIPS support](#) team.

2.3 Exam registration in KLIPS 2.0

Examinations on the various programmes are always managed via KLIPS 2.0. Students must register for them within specified deadlines. Please note that registration for courses without restriction on participation via KLIPS and registration for the corresponding module examinations are two completely separate processes. In the case of courses which are subject to a restriction on participation, an examination registration is generally only possible if a registration for the course has been submitted beforehand. Most examinations in written test form are offered twice per term. Often, this will be to “space out” the dates, i.e. students can choose the date that best fits their examination schedule. In some cases, however, the second examination may be a genuine repetition of the first, depending on the department/institute concerned. All WiSo Faculty examination candidates are entitled to see their examination papers after they have been marked. For more information, please visit the **WiSo Examination Office website**. Legally binding information concerning examinations and examination procedures is provided by the WiSo Faculty Examination Office. It also issues transcripts of records in German and

English, ranking certificates and letters of assignment to the appropriate term of the programme. All the necessary information and contact details can be found on the **Examination Office website**.

3.4 Extracurricular course me

In addition to their regular studies master's students have the opportunity to take part in extracurricular courses, in which both academic and vocational skills are taught. Thus, studies can have an academic and a professional orientation, serving development of professional competences. The extracurricular course me intends to promote and impart competences that go beyond specialist knowledge or that concern basic scientific or personal attitudes, such as: scientific curiosity, systematic and analytical thinking, dealing with complexity, solution-orientation, the ability to work in a team, foreign language competence and other skills.

The extracurricular course me is offered jointly by the faculties and the Professional Centre of the University of Cologne. The me enables students to pursue their own additional interests, to gain insights into other subjects and faculties, to attend events of social importance, to acquire professionally relevant skills and to attend language courses. In addition, students are offered learning and study aids as part of the extracurricular me, e.g. for scientific work or literature research. Extracurricular courses are not credited, but the participation is noted on the transcript of records.

3.5 Master's thesis

The master's thesis, which carries 30 ECTS credits, is written towards the end of the me. It is intended to show that the student is capable of conducting academic work on and reflecting on a specific problem related to the subject matter covered in the me, while using the necessary methods within a specified period. The topic of the master's thesis in Business Analytics & Econometrics must come from the specialisation section or from the subject group taken by the candidate in the supplementary section. If the topic relates to the supplementary section, the candidate must already have accumulated 12 ECTS credits in said supplementary section. Group master's theses are also permitted provided a clear distinction between and assessment of each candidate's contribution is possible. Objective criteria that make a clear distinction possible, such as sections, page numbers or topics, are used to indicate which student made which contribution. The total workload required of each group member must exceed the requirements for individual masters' theses to an appropriate extent. The difficulty and content of a group thesis must meet the same requirements as for theses undertaken individually and independently. The contribution made by each individual must meet the requirements for masters' theses.

To register to do their master's thesis, students must have accumulated a minimum of 60 ECTS credits. They may take no longer than six months to write the thesis. More detailed information on master's theses can be found in the Examination Regulations.

| 9 | Module Manager Univ.-Prof. Dr. Markus Weinmann | | | | |
| 10 | Miscellaneous Basic knowledge of programming, databases, modelling, data structures and algorithms as well as project management knowledge is required. Students work self-organized in teams. At set dates the teams have to present defined milestones (e.g. specification sheet, requirements specification, sprint | | | | |

| | |
|--|--|
| | <p>meeting, backlogs, interim presentation, final presentation, finished end product including program code). The work results are compared and corrected if necessary, so that all teams are able to complete their project assignment. It is possible to work with companies from the field on concrete problems of data analysis.</p> |

| 10 | Miscellaneous Delivery and discussion of presentations, prepared in the form of written papers under guidance. Students will generally be advised of compulsory reading and the topics for the presentations towards the end of the preceding term. Which topics are to be assigned to which students is decided after they have been advised of the topics available, towards the end of the preceding term. To enhance the learning outcome and expand the creative component, the advanced seminar can also be project-based or in the style of a case study. In these cases, a specifically defined assignment is | | | | |

| | |
|--|---|
| | <p>given in addition to the compulsory reading. The written paper and the presentation then report on the approaches taken when attempting to answer the question or solve the task on the literature and the students' own work.</p> |

| SpM Marketing Performance Management | | | | | |
|---|---|--------------------------|-----------------------------------|--|-----------------------------------|
| Module Code 1266MSMPF1 | Workload 180h | ECTS Credits 6 | Module Language English | Module Availability every 2nd term - winter term | Duration 1 Term |
| 1 | Courses Marketing Performance Management | | Contact Hours 45h | Self-Studies 135h | Course Language English |
| 2 | Module Content The module deals with central questions of marketing performance management and includes conceptual and applied elements, including presentations by guest speakers and discussions from the world of marketing. Students are required to organise their own learning and working processes independently and self-responsibly in addition to attending lectures and participating in exercises. In addition, it is expected that students read the related literature. | | | | |
| 3 | Learning Objectives Students... ... analyse current questions and challenges that arise when quantifying and evaluating marketing activities in financial terms. ... assess and discuss findings and research results of specialised marketing theories, concepts, and methods in the domain of marketing performance management. ... act responsibly considering ecological, social and ethical criteria. ... know and understand the relevant methods and theories for the points mentioned above under "Module content". | | | | |
| 4 | Teaching and Learning Methods lecture practice | | | | |
| 5 | Module Entry Requirements Recommendation: basic knowledge of marketing and multivariate methods | | | | |
| 6 | Mode of End-Of-Module Examination Written test: WT (60) | | | | |
| 7 | Prerequisites for Awarding of Credit Points Passing the module examination | | | | |

| 9 | <p>Module Manager Univ.-Prof. Dr. Marc Fischer</p> |
| 10 | <p>Miscellaneous This module may consist of at least one course that takes place either until the middle of the semester (1. term) or from the middle of the semester onwards (2. term). You can find this information in the KLIPS entry of the corresponding course. The corresponding examinations of courses that take place in the 1. term are often offered in the middle of the semester.</p> |

| SpM Business Project | | | | | |
|----------------------------------|---|---------------------------|--|---|--|
| Module Code 1266MSBPR1 | Workload 360h | ECTS Credits 12 | Module Language English | Module Availability every term | Duration 1 Term |
| 1 | Courses a) Business Project in Marketing b) Applied Research Project in Marketing | | Contact Hours a) 30h b) 30h | Self-Studies a) 330h b) 330h | Course Language a) English b) English |
| 2 | Module Content The module includes conceptual and applied elements, including presentations by the students, case studies, discussions and guest speakers from industry. Students work on real-world problems for which they then present solutions using the skills and knowledge they have acquired during the program. Students are required to do their own reading independently in addition to attending working sessions. | | | | |
| 3 | Learning Objectives Students... ... collect and analyse data material for selected scientific questions using quantitative / qualitative methods. ... collect, systematize and synthesize independently literature on selected scientific questions. ... communicate continuously and purposefully in diverse teams. ... justify and defend (independently developed) positions or problem solutions. ... develop work processes for real problems and challenges. ... know and understand the relevant methods and theories for the points mentioned above under "Module content". | | | | |

| 10 | Miscellaneous Delivery and discussion of presentations, prepared in the form of written papers under guidance. Students will generally be advised of compulsory reading and the topics for the presentations towards the end of the preceding term. Which topics are to be assigned to which students is decided after they have been advised of the topics available, towards the end of the preceding term. To enhance the learning outcome and expand the creative component, the advanced seminar can also be project-based or in the style of a case study. In these cases, a specifically defined assignment is | | | | |

| | |
|--|---|
| | <p>given in addition to the compulsory reading. The written paper and the presentation then report on the approaches taken when attempting to answer the question or solve the task on the literature and the students' own work.</p> |

|----------------------------------|---|--------------------------|-----------------------------------|--|-----------------------------------|
| Module Code 1302MBMAC1 | Workload 180h | ECTS Credits 6 | Module Language English | Module Availability every 2nd term - winter term | Duration 1 Term |
| 1 | Courses Macroeconomics | | Contact Hours 60h | Self-Studies 120h | Course Language English |
| 2 | Module Content The course focuses on macroeconomic theory and issues. In its first part, it covers key determinants of economic growth and cross-country income differences, using modern growth theory. In the second part, short-term fluctuations in economic activity and stabilisation policy are covered, using real business cycle and new Keynesian models. Both parts ask when market outcomes are sustainable, whether they coincide with outcomes that are optimal from society's perspective, and whether economic policy can help achieve socially desirable outcomes. The course also introduces methods of dynamic optimisation and simulation of macroeconomic models. | | | | |
| 3 | Learning Objectives Students... ... understand advanced, specialized theories / methods. ... analyse current questions and challenges. ... present scientific results in a way that is appropriate for the target audience. ... act responsibly considering ecological, social and ethical criteria. ... critically evaluate current social developments and develop alternative solutions. ... know and understand the relevant methods and theories for the points mentioned above under "Module content". | | | | |
