# 1 Economic Research

The Master's in Economic Research prepares students in particular for a future career in economic research. Graduates can understand overall and microeconomic processes and structures, analyze them theoretically and empirically using scientific methods, develop research questions independently and make their own scientific contributions.

## 1.1 Content and objectives of the programme

The master's degree corresponds to level 7 of the German Qualifications Framework/European Qualifications Framework, and to the master's level of the German Qualifications Framework for University Degrees. The competencies which are acquired over the course of studies are listed below as "Intended Learning Outcomes". These Intended Learning Outcomes consist of "Learning Goals" and "Learning Objectives". The former are superordinate goals for the graduates of this study programme, while the latter refer to concrete tasks performed by the students.

	<b>Graduates act as/with...</b>
Subject-related and analytical competencies	<b>...theory-based econometrics specialists to develop socially relevant economic research.</b>
	<i>Students apply advanced microeconomic or macroeconomic theories and methods.</i>
	<i>Students apply mathematical and / or econometric and experimental methods to solve economic problems and evaluate causal relationships.</i>
	<b>...strategic thinkers to develop solutions to economic challenges using current research ideas.</b>
	<i>Students derive economic relationships and forecasts theoretically and using appropriate econometric methods.</i>
	<i>Students analyse current research in the field of market design and behavioral economics.</i>
	<b>...experts in economic science issues to positively influence future economic challenges.</b>
	<i>Students engage in solution-oriented discussions of positive and normative issues in political economy, finance, and financial market instability.</i>
Communicative and cooperative competencies	<b>...reflective discussion leaders to critically defend their own positions.</b>
	<i>Students discuss economic topics with explicit research relevance in diverse teams and in English.</i>
	<i>Students scrutinise current political and social developments regarding potential research projects.</i>

Personal competencies	<b>...responsible leaders to set scientific accents in the field of Economics.</b>
	Students take a stance on responsible action, taking into account social, ethical, ecological and economic criteria.
	The students design their learning and working processes independently, assess them according to self- and external reflection and develop them continuously.

With the acquired competencies, graduates have the opportunity to undertake a doctorate in the field of economics. Due to their distinctive knowledge of methods, graduates are also qualified for other activities which require a classical economic study. They have a wide range of employment opportunities specifically in economic fields of public institutions: Ministries, central banks, offices and authorities (such as antitrust authorities or regulatory authorities), European institutions (such as the EU Commission), international institutions (such as OECD, IMF or World Bank). In addition, research institutions and economic departments of private institutions (banks, consulting firms, large industrial enterprises, associations, media) offer fields of employment. A combination of certain specialisation modules (e.g. microeconomics, macroeconomics, media or financial market economics) with supplementary business management modules opens up additional opportunities on a job market in the field of business administration. Fields of activity can also be found in consulting companies, scientific research institutes or universities. In addition to a relevant bachelor's degree, the requirements for admission listed in the regulations for determining special suitability must be fulfilled.

## 1.2 Requirements

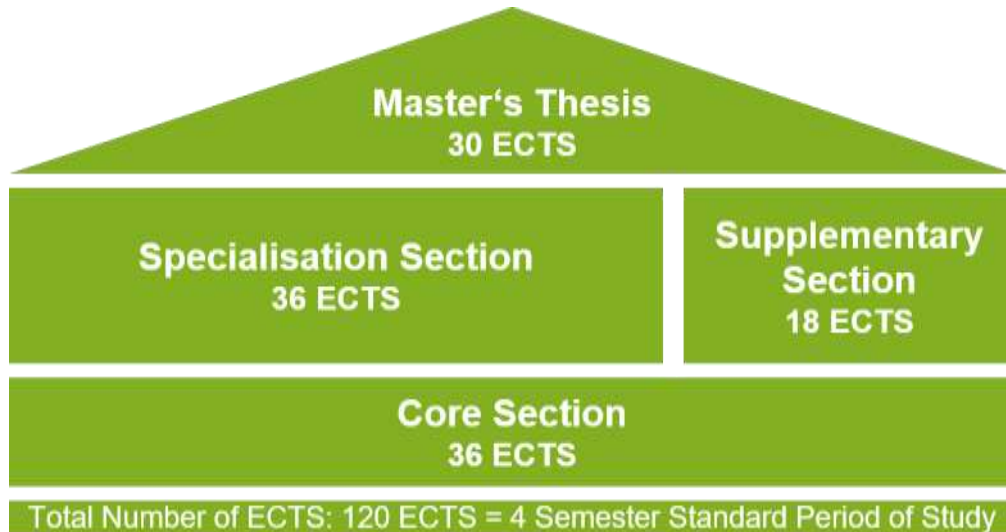

The admission requirement for the study programme is a first professionally qualifying degree in a relevant bachelor's programme of at least six semesters in duration with at least 180 credit points, or an equivalent successfully completed course of study with a final grade of 2.5 or better. Furthermore, English language skills at level C1 according to the Common European Framework of Reference for Languages are required at the beginning of the programme.

These and other subject-related requirements for the course of study are defined in the **admission regulations**.

## 1.3 Programme structure

The master's programme is modular in its structure and the standard period of study is four semesters. Students are required to accumulate 120 ECTS credits. Students first complete the core modules, which contribute a total of 36 ECTS credits. In the supplementary section, students can complete 18 ECTS credits in further courses of the master's programme in Economic Research or in the regular master's programme Economics. The specialisation section consists of 36 ECTS credits and includes a selection of four out of six selectable modules which

represent the faculty's economic research focus. In addition, two reading groups must be completed, in which students have the opportunity to present their research ideas to a specialist audience. Students can focus on specific topics. For the final master's thesis and its defence, 30 LPs are planned.

#### 1.4 Study Abroad Option

The WiSo Faculty offers a broad range of study abroad options within an excellent network of prestigious partner universities worldwide. The so-called Study Abroad Programme (STAP) includes ERASMUS exchanges and provides an opportunity for a single term stay at one of the WiSo Faculty's partner universities.

Successful STAP applicants benefit from direct contact and organisational support at the partner university and are exempt from paying tuition fees there. The range of universities available depends on the master course on which the student is enrolled – the possible options are listed in the [WiSo EXchange \(WEX\) International Outgoings Portal](#) (access through the student's UoC account only), along with detailed information on each university.

In addition to these options offered by the faculty, master's students can also apply for a non-WiSo exchange, offered by Dezernat 9 – Internationales (Central International Office of the University of Cologne) within the 'fakultätsübergreifende Partnerschaften' framework. Further possibilities are going abroad as a freemover (i.e. as a student who organises his or her stay abroad individually) or participating in short courses or summer schools offered under separate terms and conditions.

For all study abroad options, the [International Relations Centre \(ZIB WiSo\)](#) serves as point of information and advice.

**The Faculty’s Study Abroad Programme (STAP):**

Master’s students should plan and submit their application for a term abroad at the beginning of their master’s studies. The STAP main selection round takes place once a year with application deadline of 15<sup>th</sup> January and allows for an application either for fall term or spring term of the following academic year. Detailed information on the selection criteria and the best preparation for a STAP application can be found online in the [STAP Master Application Manual](#). As an exception, if a certain number of slots are still available for spring term, a secondary STAP selection round will be offered in May, with a limited choice of exchange opportunities.

**STAP Master – main selection round (fall term and spring term)**

\* Alternative offer: if no offer can be given at one of the five preferred universities and if slots at other universities are available.  
 \*\* End of main selection round. In case any exchange slots become available after 15 March, these slots will be made available in a secondary selection round.

**STAP Master – secondary selection round (for spring term only)**

Please note: there is no guarantee that a secondary selection round will take place every year, nor should a wide range of exchange opportunities be expected.

\*\* Deadline for handing in TOPPLS/RETS results: Of taken until 1 April; 15 June. \*\* Alternative offer: if no offer can be given at one of the five preferred universities and if slots at other universities are available.

**Credit transfer options from studies abroad:**

The WiSo Faculty has put a lot of emphasis on internationalisation in the design of its master courses, offering broad credit transfer options for all kinds of study abroad options. Each master course includes at least one "Studies Abroad" module, with a broad range of courses suitable for credit transfer. If requirements are met, a single course-to-course credit transfer can be considered. For more information on credit transfer rules and regulations, please go to [WiSo Credit Transfer Centre](#) > Information > Studies Abroad. For any questions regarding credit transfer, students can contact [ZIB WiSo](#) or the [WiSo Credit Transfer Centre](#).

ECONOMIC RESEARCH – MASTER OF SCIENCE

Sections **Core** Specialisation Supplementary

\* When creating your individual study plan, pay attention to the respective module availability. This may result in deviations from the general recommendation.

\*\* If requirements are met, individual crediting of successfully completed studies abroad modules is possible.

### 1.6 Modules with mid-term examinations

Some modules have courses that only run for half a term and usually with twice the normal number of classes. For these modules, the term is divided into two roughly equal halves. In the fall, the mid-term usually ends at the beginning of December; in the spring, it is usually in the middle or at the end of May. Often, the examinations for these courses are held mid-term, enabling students to reduce their examination load at the end of term.

Information regarding the dates of courses and examinations can be found in the campus management system (KLIPS).

### 1.7 Calculation of the overall mark

The marks for core, supplementary as well as specialisation sections are calculated as the weighted arithmetic mean of the marks for the respective modules, based on the weighting system described in the examination regulations. In the case of end-of-module examinations consisting of several components, the mark for the module is calculated as specified in the **examination regulations**.

The overall mark for the degree is calculated as the weighted arithmetic mean of the marks for the subject categories and the mark for the master's thesis. For the Economic Research programme, the weighting for the contributions to the overall mark is as follows:

- a) Mark for core section: 36 out of 120 LP
- b) Mark for specialisation section: 36 out of 120 LP
- c) Mark for supplementary section: 18 out of 120 LP
- d) Mark for master's thesis and defence: 30 out of 120 LP

### 1.8 Rules for failed attempts

Students may retake module examinations that they have failed. The number of attempts is limited to three per module. Modules offered by faculties other than the Faculty of Management, Economics and Social Sciences ("WiSo Faculty") may be subject to different rules.

After failing an exam three times, the **WiSo Student Service Point (WiSSPo)** provides information regarding the possibility and the requirements to receiving additional resit attempts. If none of the first three examination attempts were failed due to cheating or to an offence, further two resit attempts can be granted at any point of the programme. Students who have accumulated at least 90 ECTS can be granted a further additional attempt. If a student fails an examination in the two additional attempts and the extra attempt for students with 90 ECTS or more,

they are deemed to have failed the programme at the final attempt. Where a module examination consists of several components, the candidate must obtain a “bestanden” (pass) mark, or at least an “ausreichend (4,0)” (sufficient) mark, in all of the examination components. All components marked “mangelhaft (5,0)” or “nicht bestanden” (fail) must be retaken.

It is not possible to resit module examinations that have already been passed.

A failed master’s thesis can be retaken once, with a new topic. Students can only register for a second attempt after the result of their first attempt being announced.

## 2 Support for students

### 2.1 First Point of Contact for Questions and Counselling

The [WiSo Student Service Point](#) (WissPo) is the first, central contact point for students who have questions and problems during their studies. WissPo is also the first point of contact for further counselling offers, e.g. studying abroad, wellbeing, careers guidance. Students can contact WissPo via phone, email or visit in person. Please take note of the opening times and contact details on the website.

### 2.2 Course registration in KLIPS 2.0

[KLIPS 2.0](#) is the central campus management system of the University of Cologne. At the WiSo Faculty, KLIPS 2.0 serves as a student organisation tool. Students should use it as an online course catalogue, for registration and deregistration of courses and examinations, as well as an overview of the complete study programme and calendar. Information on current dates and deadlines of the WiSo faculty, as well as video tutorials and FAQs about KLIPS can be found on the [WiSo-KLIPS-Support](#) website. If you have further questions, please contact WiSo-KLIPS-Support via this [contact form](#). For questions regarding your KLIPS account, please contact the central [KLIPS support](#) team.

### 2.3 Exam registration in KLIPS 2.0

Examinations for the programme are always managed via KLIPS 2.0. Students must register for examinations by the specified deadlines. Please note that the registration for courses without restrictions on participation and the registration for the corresponding module examinations are two separate processes in KLIPS 2.0. In courses where participation restrictions exist, the examination registration is generally only possible if the course registration has been submitted beforehand. Most module examinations with a written test format are offered twice per semester. Often, this will be to “space out” the dates, i.e. students can choose the date that best fits their examination schedule. In some cases, however, the second examination may be a genuine repetition of the first, depending on the department/institute concerned.

All examination candidates at the faculty are entitled to see their examination papers after they have been marked. For more information, please visit the [WiSo Examination Office website](#).

Legally binding information concerning examinations and examination procedures is provided by the [WiSo Faculty Examination Office](#). It also issues transcripts of records in German and

English, ranking certificates and letters of assignment to the appropriate term of the programme. All the necessary information and contact details can be found on the [examination office website](#).

### 3 Curriculum and module descriptions

#### 3.1 Core section

In accordance with section 31(1), No. 1 of the Examination Regulations, the examination candidate must obtain 36 ECTS credits in the core section.

Group	Module	ECTS	CC/ EC	Required ECTS	
Core Section Economic Research	CM Advanced Mathematics	6	CC	6	36
	AM Computational Methods	6	EC	6	
	AM Selected Methods in Economics	6	EC		
	CM Advanced Microeconomics I	6	EC	6	
	CM Advanced Microeconomics II	6	EC		
	CM Advanced Macroeconomics I	6	EC	6	
	CM Advanced Macroeconomics II	6	EC		
	CM Advanced Econometrics I	6	EC	6

<sup>1</sup> The registration for the examination and recognition is not possible if the examination for the module "SuM Energy and Climate Change I" has already been successfully completed.

<sup>2</sup> The registration for the examination and recognition is not possible if the examination for the module "SuM Energy and Climate Change II" has already been successfully completed.

<sup>3</sup> The registration for the examination and recognition is not possible if the examination for the module "SuM Energy and Climate Change III" has already been successfully completed.

<sup>4</sup> The registration for the examination and recognition is not possible if the examination for the module "SuM Energy and Climate Change IV" has already been successfully completed.

### 3.4 Extracurricular course programme

In addition to their regular studies Master's students have the opportunity to take part in extracurricular courses, in which both academic and vocational skills are taught. Thus, it can have an academic and a professional orientation, which serve the development of professional competences. The extracurricular course programme intends to promote and impart competences that go beyond specialist knowledge or concern basic scientific or personal attitudes: scientific curiosity, systematic and analytical thinking, dealing with complexity, solution-orientation and other skills, e.g. the ability to work in a team and foreign language skills.

The extracurricular course programme is offered jointly by the faculties and the Professional Centre of the University of Cologne and enables students to pursue their own additional interests, to gain insights into other subjects and faculties, to attend events of social importance, to acquire professionally relevant skills and to attend language courses. In addition, students are offered learning and study aids as part of the extracurricular programme, e.g. for scientific work or literature research. Extracurricular courses are not credited, but the participation is noted on the transcript of records.

### 3.5 Master's thesis

The Master's thesis is intended to prepare the processing of research projects for a doctorate. Within the framework of the Master's thesis, an economic problem must be solved independently within a given period of time (generally 6 months) and in compliance with the principles of scientific work. The aim of the Master's thesis is to develop a first research project with an innovative scientific contribution. The written thesis will be evaluated with 24 credits. The defense of the Master's thesis is evaluated with 6 credits.

To register to do their master's thesis, students must have accumulated a minimum of 60 ECTS credits. They may take no longer than six months to write the thesis. Further, more detailed information on master's theses can be found in the Examination Regulations.

<b>3</b>	<b>Learning Objectives</b> Students... ... know and understand the relevant methods and theories for the points mentioned above under "Module content".				
<b>4</b>	<b>Teaching and Learning Methods</b> lecture practice				
<b>5</b>	<b>Module Entry Requirements</b> Recommendation: Prior knowledge of contents covered in CM Advanced Econometrics I or equivalent is strongly recommended.				
<b>6</b>	<b>Mode of End-Of-Module Examination</b> Written test: WT (90)				
<b>7</b>	<b>Prerequisites for Awarding of Credit Points</b>				
<b>8</b>	<b>Other Programmes that Use the Module</b> Master of Science Economic Research: Core Section Economic Research				
<b>9</b>	<b>Module Manager</b> Univ.-Prof. Dr. Anna Bindler				
<b>10</b>	<b>Miscellaneous</b> This course will not be offered in the academic year 24/25.				

## 3.6.2 Specialisation Section Economic Research

<b>SpM Advanced Public Economics</b>					
<b>Module Code</b> 1302MSAPE1	<b>Workload</b> 180h	<b>ECTS Credits</b> 6	<b>Module Language</b> English	<b>Module Availability</b> every 2nd term - winter term	<b>Duration</b> 1 Term
<b>1</b>	<b>Courses</b> Advanced Public Economics		<b>Contact Hours</b> 45h	<b>Self-Studies</b> 135h	<b>Course Language</b> English
<b>2</b>	<b>Module Content</b> <ul style="list-style-type: none"> <li>• Optimal income taxation</li> <li>• Optimum excise duties</li> <li>• Optimal combination of direct and indirect taxes</li> <li>• Taxation of capital income</li> <li>• Corporate taxation</li> <li>• Political economy of redistributive taxes</li> <li>• Sufficient statistics approaches</li> <li>• Perturbation method</li> <li>• Mechanism design</li> </ul>				
<b>3</b>	<b>Learning Objectives</b> Students... ... analyse tax and expenditure policy. ... discuss conflicts between efficiency and distribution targets. ... apply methods for the formal analysis of optimal tax systems. ... apply methods for the formal analysis of tax reforms. ... know and understand the relevant methods and theories for the points mentioned above under "Module content".				
<b>4</b>	<b>Teaching and Learning Methods</b> lecture practice				
<b>5</b>	<b>Module Entry Requirements</b> Recommendation: basic knowledge of differential calculus, optimisation problems with constraints, knowledge of consumer theory, knowledge of game theory				
<b>6</b>	<b>Mode of End-Of-Module Examination</b> Written test: PO				
<b>7</b>	<b>Prerequisites for Awarding of Credit Points</b> Passing the module examination				
<b>8</b>	<b>Other Programmes that Use the Module</b> Master of Science Economics: Supplementary Section Economics Master of Science Economic Research: Specialisation Section Economic Research Supplementary Section Economic Research				
<b>9</b>	<b>Module Manager</b> Univ.-Prof. Dr. Felix Bierbrauer				

ECONOMIC RESEARCH – MASTER OF SCIENCE

valid for students of the ER 2021 (enrolment from winter semester 2021/22)

<b>10</b>	<b>Miscellaneous</b>
-----------	----------------------

<b>SpM Advanced Behavioural Economics</b>					
<b>Module Code</b> 1289MSABE1	<b>Workload</b> 180h	<b>ECTS Credits</b> 6	<b>Module Language</b> English	<b>Module Availability</b> every 2nd term - summer term	<b>Duration</b> 1 Term
<b>1</b>	<b>Courses</b> Behavioural Economics		<b>Contact Hours</b> 45h	<b>Self-Studies</b> 135h	<b>Course Language</b> English
<b>2</b>	<b>Module Content</b> Departing from a general treatment effects framework, this module focuses on econometric methods that are of particular use to behavioural economists. Examples are sampling and power analysis, treatment effects with and without randomisation, discrete choice, mediation analysis, treatment effect decompositions as well as structural behavioural methods.				
<b>3</b>	<b>Learning Objectives</b> Students... ... understand what statistical/econometric considerations to take into account when generating their own data in a lab or field experiment. ... know how to choose appropriate estimators to tackle behavioural economic questions. ... know how to evaluate societally relevant policies (e.g. social or gender policies) from a behavioural economic perspective. ... know how to read/judge empirical papers in behavioural economics. ... know and understand the relevant methods and theories for the points mentioned above under "Module content".				
<b>4</b>	<b>Teaching and Learning Methods</b> lecture practice				
<b>5</b>	<b>Module Entry Requirements</b> Recommendation: Core Module Advanced Microeconomics I				
<b>6</b>	<b>Mode of End-Of-Module Examination</b> Written test: PO				
<b>7</b>	<b>Prerequisites for Awarding of Credit Points</b> Passing the module examination				
<b>8</b>	<b>Other Programmes that Use the Module</b> Master of Science Economics: Supplementary Section Economics Master of Science Economic Research: Specialisation Section Economic Research Supplementary Section Economic Research				
<b>9</b>	<b>Module Manager</b> Univ.-Prof. Dr.' Pia Pinger

## 3.6.4 Master Thesis in Economic Research

<b>Master thesis in Economic Research and Colloquium</b>					
<b>Module Code</b> 1287MMERE1	<b>Workload</b> 900h	<b>ECTS Credits</b> 30	<b>Module Language</b> German and English	<b>Module Availability</b> every term	<b>Duration</b> 1 Term
<b>1</b>	<b>Courses</b>		<b>Contact Hours</b>	<b>Self-Studies</b>	<b>Course Language</b>
<b>2</b>	<b>Module Content</b> The topic of the Master's thesis must emphasize the methods of economics learned during the course of study.				
<b>3</b>	<b>Learning Objectives</b> Students... ... know the current state of the theoretical and methodical discussions of the subject and use it through independent scientific work. ... identify scientifically viable questions and problems. ... work on these questions independently on the basis of the relevant primary and secondary literature. ... formulate theoretical and methodical (qualitative and/or quantitative) approaches for scientific research work. ... draw up a research plan and implement it independently. ... organise and design a scientific research process. ... collect relevant data on their own responsibility and evaluate them methodically and competently. ... discuss theoretical and methodical problems in depth in exchange with teachers, other students and those interested in the subject. ... critically evaluate research results and develop scientifically and socially relevant conclusions from research results.				
<b>4</b>	<b>Teaching and Learning Methods</b> Master's thesis defense Master's Thesis				
<b>5</b>	<b>Module Entry Requirements</b> 60 ECTS credits obtained				
<b>6</b>	<b>Mode of End-Of-Module Examination</b> Kombinierte Prüfung: RE, schriftliche Abschlussarbeit 6 Monate				
<b>7</b>	<b>Prerequisites for Awarding of Credit Points</b> Passing the module examination				
<b>8</b>	<b>Other Programmes that Use the Module</b> Master of Science Economic Research: Master Thesis in Economic Research ABGELEHNT - Master of Science Economic Research (Ab WS 24/25): Master Thesis in Economic Research				
<b>9</b>	<b>Module Manager</b> Univ.-Prof. Dr. Felix Bierbrauer				

ECONOMIC RESEARCH – MASTER OF SCIENCE

valid for students of the ER 2021 (enrolment from winter semester 2021/22)
